BOSTON, THURSDAY, FEBRUARY 10, 1927-VOL. XIX, NO. 64

GOODWIN WOULD TAX BOTH "GAS" AND DIVIDENDS

Motor Vehicle Registrar Yields Point in Plea for His Measure

INSISTS ON LEVY ON DOMESTIC EARNINGS

Recommends Revenue From That and "Gas" Go to Cities and Towns, Not to State

"While I consider the gasoline tax a fair form of taxation, I think it should become a slogan throughout the State that no more taxes shall be laid upon automobilists until the now tax-exempt stocks of Massachusetts corporations are made to pay their share under the income tax

with this declaration, Frank A. Goodwin, state registrar of motor vehicles and acting president of the Commonwealth Service Association, submitted to the Legislative Committee on Taxation today the case for his bill to extend the 6 per cent state income tax to the recipients. state income tax to the recipients of dividends from domestic corpora-tions the same as it now applies to the Massachusetts stockholders of

oreign corporations. Erland F. Fish, Senator of Brookline, chairman of the tax committee, during the hearing announced him-self in favor of the extension of the self in favor of the extension of the income tax as urged by Mr. Goodwin, but differed with the latter upon the advisability of pushing through a bill to this effect at the present session, thinking that instead it should be given mature study in order to fit it into the general tax system of the State. system of the State.

Prepares Stock Tax Bill

Trepares Stock Tax Bill
The Senator disclosed that he has
prepared a comprehensive bill on the
subject which he intends to submit
to the proposed special commission
on taxation which it is expected will
be established this year under an
order filed by Wellington Wells,
president of the Senate, and now
under consideration.

Mr. Goodwin presented estimates

Mr. Goodwin presented estimates to show that the taxation of Massachusetts corpolation dividends would bring the State \$10,000,000 additional revenue annually. He advised that the change be accompanied by a re-peal of the so-called "dividend credit" given to foreign corporations who have Massachusetts stockholders, and have Massachusetts stockholders, and said this repeal would bring the State another \$3,000,000 a year. This aggregate of \$13,000,000 annual additional revenue, he said, could be distributed to the cities and towns to relieve the load of property taxation upon real estate owners, farmers, home builders and rent payers.

He estimated that the amount of dividends paid by Massachusetts corporations now, and not taxed, is at least \$170,000,000 a year.

Discusses Double Taxation

Discusses Double Taxation Taking up the argument that to tax these dividends while the corporations themselves pay property taxes in Massachusetts would be double taxation, Mr. Goodwin said that the customers of the corporations and not the stockholders, pay the companies' property taxes. As an instance he cited the case of the Boston Elevated Railway, where taxes are included in operating ex-penses and charged to the car rider in calculating the fare base.

He quoted a Massachusetts Supreme Court opinion in the Bellows Falls Power Company case as saying in the words of a United States Supreme Court decision, "It is well settled that the property of the shareholders in their respective shares is distinct from the corporate property, franchises and capital

"The only argument I have ever heard against taxing the dividends of Massachusetts corporations is that it will prevent investment in our home industries," Mr. Goodwin continued.
"The best answer to that is that Massachusetts investors now hold shares of stock in foreign corporations doing business in Massachusetts to the amount of \$1,300,000,000, and they have made these investments notwithstanding the 6 per cent on their dividends."

Revenue to Cities and Towns When questioned by Joseph Martin, Representative as to his views on the gasoline tax in this connection, the Registrar said he was not opposed to that tax if at the same time the tax laws are extended to bring in the now exempt recipient of Massa-chusetts corporation dividends. He added that he believes the revenue from the gasoline tax and from this new income tax should go to the citles and towns rather than into the

state treasury.

Mr. Goodwin explained that he appeared as a representative of the Commonwealth Service Association, that his objection was to answer the challenge of Governor to show where state expenditures could be cut down or state revenues expanded. He said considered it virtually impossible to reduce the state budget, but said his bill offered a sound and fair way of meeting the request of state em-ployees for improved pay. John F. Miller, attorney for the

Service Association, followed Mr. Goodwin, amplifying his figures and explaining legal phases of the bill.

PRESIDENT SIGNS BAN ON MAILING FIREARMS

WASHINGTON, Feb. 10 (A)-President Coolidge yesterday signed the bill declaring revolvers, pistols and other firearms capable of being concealed on the person non-maliable and providing penalties for violation of its provisions.

FARM RELIEF

You are thinking of them as tomers. But they cannot buy all.

Special from Monitor Bureau CHICAGO, Feb. 10-"If Europe had he means of buying American food every farmer in the United States every farmer in the United States would be prosperous," Sir George Paish, British economist, told a gathering of business leaders under auspices of the Chicago Association of Commerce. He located the solution of the American farm problem in Europe. America's food surplus is needed abroad, he reported, but Europe's declining ability to buy threatens difficulties not alone in the United States, but in Canada and Australias "We haven't the means of buying

"We haven't the means of buying your food products," he declared. "That's the cause of the trouble. The world's demand for foodstuffs is declining and something must be done to expand it."

The great thing lacking is America's willingness to buy, he said. America has loaned vast sums abroad and in company with other nations is and in company with other nations is pressing its goods wherever it can in foreign lands. But peoples who can-Chang Tso-lin's Troops Reported Advancing to South ision, he warned, was limited.

Removal of Tariff Walls "The present policy of the world is an impossible one," Sir George told his audience at the center of the middle western farming section.

"So far as Europe is concerned, measures are beginning to be taken. The League of Nations has called an economic conference in May. There is hope the situation may begin to be modified and tariffs taken down. ure is that since the war it does not know how to buy its food or raw materials."

The British authority then sketched the financial revolution caused by the war—how European loans in the United States had given away to American loans in Europe and in other important relations Europe

George Washington Painter-Decorator

Not Only Did He Hang Paper in a Pinch, but He Was Helped by Lafayette

MILWAUKEE, Wis. (A)-George Washington and the Marquis de Lafayette once assumed the rôles sembled at or near Shanghai as a of painters, decorators and wallpaper result of Chinese hostility.

From Hankow, however, came ternational Association of Painters and Decorators here were told.

This little known episode in the lives of the first American President and of the French nobleman, who cast his lot with the 13 colonies, was cast his lot with the 13 colonies, was called to the attention of the con-vention by C. W. Cousens, commis-sioner of the Wallpaper Manufac-turers' Association.

A painting showing Washington and Lafayette in overalls hanging wallpaper on the walls of Washington's Mount Vernon home, was presented by Mr. Cousens to George Hambrecht, Wisconsin State director

There were such things as strikes mong painters and decorators even in Washington's time, the brochure in washington's time, the prochure pointed out and one occurred on the eve of a ball Martha Washington had planned at Mount Vernon. With a large expanse of woodwork to be painted and a vast area of bare wall to be papered. Washington and Lafayette were said to have risen to the occasion by loing the job them-selves.

BUTLER-BORAH ON DRY DEBATE

Both Agree to Go Before Nation's Voters and Debate the Issue

NEW YORK, Feb. 10 (A)—Dr. Nicholas Murray Butler, president of Columbia University, and William E. "America has loaned \$1,200,000,000 abroad," he continued, "and this alone has enabled us to pay you. That is mortgaging the future. Those loans are of very great value to us. They are helping Europe to buy food. Borah (R.), Senator from Idaho, dif-fering sharply on prohibition, are in agreement to present the issue as they see it to the voters in advance of the national nominating conventions of next year.

We are grateful but we are also in-dependent. We want to pay our debts. We want to honor every obligation. But we cannot go on borrowing money to meet our obligations. In accepting the proposal of Sena-tor Borah, Dr. Butler also replied to a request from the Idaho Senator for a detailed statement of his position on prohibition by declaring for re-peal of the Eighteenth Amendment and the Volstead Act and by express-ing the hope the Republican ty-officially would adopt the same t-"The world is as deep in debt as it ought to be. I hope you will keep on loaning us money to give our statesmen time to think and in order that every dollar you lend will do good. There is every reason to continue.

omcially would adopt the same titiude.

"I have done whatever my time and strength have permitted to keep this issue before the people in all parts of the United States," the educator wrote. "So far as time and strength and the heavy pressure of personal and professional duties will permit, I shall certainly continue this course of action during the months that lie before us. "Great Britain is not borrowing. Great Britain is lending. America and Great Britain must go on lend-ing. We must see that measures are taken to modify this situation, to see that each nation must buy as much months that lie before us. "You must think how you will take payments, not only how to sell. We

"I am prepared at any convenient time to confer with you or any other of our (Republican) party associates as to how best and most effectively to accomplish the end that we both have in mind.

nations have not considered the pay-ment sign—how to take pay but only to press their sales upon the "You ask me two main questions These are my answers:
"I am in favor, specifically and definitely, of the repeal both of the Eighteenth Amendment and of the Volstead Act. It would make me very glad to have the Republican Party, to which I have given such service

riers. Instead of having 118,000,000, you would have 1,800,000,000. Your trade today is insignificant with the as I am capable since early man-hood, take that position.

"It would thereby place itself once more at the head of a great move-ment to conserve the federal form of trade I know you would do.
"You are helping the world in a
way you have no conception of to become wealthler by your labor savgovernment established by the Con-stitution, to defend that local self-Eighteen hundred millions of people government on which our whole soare anxious to get out of their old conditions of poverty. They cannot buy if they cannot sell." cial and political structure has rested, and to accomplish by effective and practical means the total abolition of the private traffic in intoxicating liquors, the discontinuance of the saloon, and the promotion of true temperance, without at the same time invading and restricting BILL OPPOSED the just, civil and political liberties of the individual.

"In my judgment, this can be done. This is the position which I am prepared to defend before such part Rhode Island Textile Assoof the public as will listen.

of the public as will listen.

"To your second question, I answer that I should not oppose the Republican Party pledging itself specifically to the upholding of and enforcement of the Eighteenth Amendment so long as that amendment remains a part of the Constitution, provided that the declaration be so drawn as to make it plain that this enforcement of the Eighteenth Amendment is always and everywhere to be accompanied by the like enforcement of the other provisions of the Constitution, including particularly those contained in the first 10 amendments, which constitute the

it would react to the detriment of the Southern cotton planter and the it would react to the detriment of the Southern cotton planter and the farmer.

"Artificial price fixing is unsound," he said, "and that taxtile men believe it to be unsound is proved by the fact that they did not ask the Government to do any price fixing at a time when the textile trade was suffering from overlie trade was suffering from overproduction."

Henry F. Lippitt, former United States Senator and chairman of the Southern of directors of the Manyille-Jenckes Company and a former president of the New England Cotton Manufacturers' Association, declared that for the United States to arrange

Manufacturers' Association, declared that for the United States to arrange for cotton manufacturers to buy the product cheaper abroad than it could be bought here "where it was grown" would be most illogical and an unprecedented discrimination against the industry in America.

Mr. Lippitt was chosen chairman of the cotton textile institute in New York during the organization last fall.

Simms Corner, Ohio, Only Corner That Interests Wheeling's Crew

That's Where the "Crack Flier" Stops to Bargain With Farmer on the Price of Eggs

CLEVELAND (P)—Gyrations of the stock of the Wheeling & Lake Erie Railroad on the New York Stock Exchange have not interfered with the "business as usual" attitude of the crew of the road's "crack filer" between Cleveland and Wheeling, W. Va.

The crew is more of a family than a crew and the train they operate is an institution in Obio railroading. The corner that most interests them is not being discussed in Wall.

The corner that most interests them is not being discussed in Wall Street. It is Simms Corner. ROY E. DICKERSON

DEMOLAY FORUM WORK OUTLINED

National Program Director Talks at District Meeting in Boston

Citizenship forums to interest outh in civic service were described today before a district meeting of the Order of DeMolay at the Boston Square and Compass Club by Roy E. Dickerson, national director of program and activities for the Grand Council.

Mr. Dickerson, who has been in boys' work for 20 years, and who tions submitted in the Boston Autohas been making a two weeks' tour of cities east of Kansas City, Mo., his present headquarters, will leave so far, has already received a divertonight for New York City, where he will advise local chapters there.

In Massachusetts, he visited Springfield, Lawrence and Fitchburg in New England, such as Providence, in New England, such as Providence, R. I.; Manchester, N. H.; and New-port, Vt. On his way East, Mr. Dickerson stopped off at Chicago, Pittsburgh, Erie, Pa., and Rochester, N. Y. and will fill an engagement at Scranton, Pa., en route West again. The forums, he said, are held once every three months and consist of a

30-minute program composed of a debate or address on some question of current importance not of a controversial or political nature. The Grand Council awards the various chapters making the best record in civils arraying with four prizes and council awards the various chapters making the best record in civils arraying with four prizes and council awards with the council award civic service with four prizes an-

nually, he added.
"What are we, that is the Nation "What are we, that is the Nation as a whole, doing to prepare young fork, 18 and 19 years of age, who are nearly ready to vote, to face the problems of the world when they leave high school or college?" asked Mr. Dickerson. He answered by saying that the De Molay order, with nearly 250,000 members and 1400 chapters in the country, is doing two outstanding things in this line. They are, first taking the more mature

oreign market cheaper than it can be bought here," was uttered today by William S. Pepperell of this city, president of the Rhode Island Textile Association.

Declaring that he would today telegraph the Rhode Island delegation to Congress urging that they defeat the measure and save the textile industry from ruin, Mr. Pepperell the measure and save the textile industry from ruin, Mr. Pepperell the industry fr "In our message, we take care to point out that youth is endowed with remarkable privileges and opportunithese blessings, in the nature of things, must be transmitted through Telegraph Company, received notices selves of the burden of armament. message.
The powers have been reminded that "the support of all measures looking to the preservation of the peace of the world has been long. established as a fundamental policy of this Government. The American Government and people are con-vinced that competitive armaments constitute one of the most dangerous contributing causes of international suspicion and discord and are cal-

culated eventually to lead to war. The President's Desire

Conference was called in 1921. The President in his opposition to a bigger navy for the United States cartops of the buildings in the down-town sections should be utilized as prominent members of his own party, has given evidence of his sincere desire to keep the navy where it is needed for defense only.

The President recalls that America felt then, as she does now, that deliberate self-denial and limitation of naval armament by the great pow-ers promised at least one guarantee of peace, an end worthy of mutual

adjustment and concession.

The message takes up only naval The message takes up only naval disarmament and only one phase of that, the building of cruisers, descriptions and submarines. The only limitation placed by the Washington Conference was on the size and armament of cruisers.

In short, the work of the Washington Conference was left unfinished and the President now desires to round it out. It was only to be expected, he states, that "the spirit of

dation at Harvard, for which the City Council has appropriated \$25,000 for a study of Boston traffic.

Ellerton J. Brehaut of the Boston Chamber of Commerce, Miner H. Paddock Jr., president of the Boston Automobile Club, and Deputy Supt. Thomas F. Goode of the Boston Chamber called department in Charge of Supt. Thomas F. Goode of the Boston police department, in charge of traffic, are the judges. United States in Note to Powers Again Makes Move to Scale Down Naval Armaments stage sufficiently advanced, in the opinion of the Council of the League of Nations, to warrant the establishment of the preparatory commission, to meet in 1926, to prepare the ground for an international conference at an early date. The American Government, pursuant to its policy of co-operation with all efforts calculated to bring about an actual limitation of armament, accepted the invitation of the council to be represented on the preparatory commission. The American representatives on that commission have endeavored to play a helpful part in its discussions, and they will continue to be guided by that policy. Commission's Valuable Work British Empire. France, Italy, and Japan, and that comprehensive limitation of all types of naval armament may be brought into effect among the principal naval powers without delay. to put forward rigid proposals as regards the ratios of naval strength

WASHINGTON, Feb. 10 (P)—The full text of President Coolidge's special disarmament message to Con-To the Congress of the United

States:

Pursuant to my instructions the American ambassadors at London, Paris, Rome, and Tokyo, will today present to the governments of Great Britain, France, Italy and Japan, a memorandum suggesting that they empower their delegates at the forthcoming meeting of the preparatory commission for the disarmament conference at Geneva to negotiate and conclude at an early date an agreement further limiting naval armament, supplementing the Washington treaty on that subject, and covering the classes of vessels not covered by that treaty. I transmit herewith, for the information of mit herewith, for the information the Congress, a copy of this men

randum.

I wish to inform the congress of the considerations which have moved me to take this action.

The support of all measures looking to the preservation of the peace of the world has been long established as a fundamental policy of this Government. The American Government and people are convinced that competitive armaments constitute one of the most dangerous contributing causes of international suspicion and discord and are calculated eventually to lead to war. calculated eventually to lead to war. A recognition of this fact and a desire as far as possible to remove this danger led the American Government in 1921 to call the Washington Conference.

A Guarantee of Peace

A Guarantee of Peace

At that time we were enegaged in a great building program which, upon its completion, would have given us first place on the sea. We felt then, however, and feel now, that the policy we then advocated—that of deliberate self-denial and limitation of naval armament by great naval powers—promised the attainment of at least one guarantee of peace, and end worthy of mutual adjustment and concession.

At the Washington Conference we found the other nations animated with the same desire as curselves to remove naval competition from the list of possible causes of international discord. Unfortunately, however, it was not possible to reach

agreements at Washington covering all classes of naval ships. The Washington treaty provided a specific tonnage limitation upon capital ships and alreraft carriers, with certain restrictions as to size and maximum caliber of guns for other vossels. Every nation has been at complete liberty to build any number of cruisers, destroyers, and submarines. Only size and armament of cruisers were limited. The signatories of the Washington treaty have fulfilled their obligations faithfully and there can be no doubt that that treaty constitutes an outstanding success in its operation.

can be no doubt that that treaty constitutes an outstanding success in its operation.

It has been the hope of the American Government, constantly expressed by the Congress since the Washington Conference, that a favorable opportunity might present itself to complete the work begun here by the conclusion of further agreements covering cruisers, desirability of such an agreement has been apparent, since it was only to be expected that the spirit of competition, stiffed as regards capital ships and aircraft carriers by the Washington treaty, would, sooner or later, show itself with regard to the other vessels not limited under the treaty.

Washington treaty, would, sooner or later, show itself with regard to the other vessels not limited under the treaty. Actually, I do not believe that competitive building of these classes of ships has begun. Nevertheless, farreaching building programs have been laid down by certain powers, and there has appeared in our own country, as well as abroad, a sentiment urging naval construction on the ground that such construction is taking place elsewhere. In such sentiments lies the germ of renewed naval competition.

Seeks Further Disarmament

I am sure that all governments and all peoples would choose a system of naval limitation in preference to consciously reverting to competitive building. Therefore, in the hope of bringing about an opporprincipal naval powers to ascertain whether further limitation is practicable, I have suggested to them that negotiations on this subject should begin as soon as possible.

The moment seems particularly opportune to try to secure furthe limitation of armament in accordance with the expressed will of the Congress. The earnest desire of the nations of the world to relieve themselves in as great a measure as possible of the burden of armaments possible of the burden of armaments and to avoid the dangers of competition has been shown by the establishment of the preparatory commission for the disarmament conference which met in Geneva last May, and which is continuing its work with a view to preparing the agenda for a final general conference.

ence.
For more than six months, representatives of a score or more of nations have examined from all points of view the problem of the reduction and limitation of armaments. In these discussions it was brought out very clearly that a number of nations felt that land, sea and air armaments were intersea and air armaments were inter-dependent and that it would be diffi-cult, if not impossible, to agree upon the limitation of one type of arma-ment without simultaneously limit-ing the other types.

America's Duty Defined

The consequence to be feared is that a deadlock will be reached, should even partial progress in the

should even partial progress in the reduction of armaments be conditioned upon the acceptance of some universal plan covering land, sea, and air forces together.

If the prospective deadlock cannot be broken, it is probable that little progress will be made for the time being. It appears to me to be the duty of this Government, which has always advocated limitation of armaments, to endeavor to suggest some avenue by which concrete results may be achieved even though such results may be short of an ultimate ideal solution for the threefold problem of land, sea and air armament:

consistintly expressed the view that under conditions as they exist in the world today the problems of land and air armaments are most susceptible of solution by regional agreements covering regions within which the land or air armaments of one country could constitute a po-

Geographical continents have been suggested as regions appropriate for land and air limitation agreements.

The American land and air force constitute a threat to no one are at minimum strength; their reduction has been suggested by no one as a necessary condition precent arms htitation. This constitute a threat to no one. They

are at minimum strength; their reduction has been suggested by no one as a necessary condition precedent to general arms lititation. This reduction of our land forces has been rendered possible by our favored geographical position.

I realize that the problems of armaments on land and in the air in Europe are beset with difficulties which in all justice we must recognize and, although this Government will always be ready to lend its assistance in any appropriate way to efforts on the part of European or other governments to arrive at regional agreements limiting land and air forces, it would hesitate to make specific proposals on this subject to European nations.

The problem of the limitation of naval armament, while not regional in character or susceptible or regional treatment, has been successfully treated, in part, by an agreement among the five leading naval powers, and, in my opinion, can be definitely dealt with by further agreements among those powers.

It will be a contribution to the success of the preliminary work now going on at Geneva should the great naval powers there agree upon a further definite limitation of naval armament.

A General Conference

A General Conference

A General Conference

It is my intention that the American representatives at Geneva should continue to discuss with the representatives of the other mations there the program for a general limitation of armaments conference. If such a conference should be possible in the future, on a basis generally acceptable, this Government would, of course, be gratified. Pending the formulation of the plan for such a general conference, however, I believe that we should make an immediate and sincere effort to solve the problem of naval limitation, the solution of which would do much to make the efforts toward more general limitation yuccessful.

CALVIN COOLIDGE.

The White House, Feb. 10, 1927. Memorandum:

The American Government has followed with close attention the proceedings of the preparatory commission for the disarmanent conference, and, after the most careful deliberation, has concluded that it can helpfully make certain observations at this time which, it hopes, may contribute materially to the

ernment and people of the United States.

The conviction that the competitive augmentation of national armaments has been one of the principal causes of international suspicion and ill will, leading to war, is firmly held by the American Government and people. Hence the American Government has neglected no opportunity to lend its sympathy and support to international efforts to reduce and limit armaments.

The Washington Conference

The Washington Conference The success of the Washington Conference of 1921-22 demonstrated that other powers were animated with a similar desire to do away with this dangerous source of interna-tional discord. The Washington Con-ference made a beginning, however, and it has been the continued hope of the American Government, since

pleted.

For this reason, the American Government was happy to observe that the efforts looking toward the holding of a general international conference for the limitation of armament, which had been in progress for several years under the auspices of the League of Nations, had reached, in December, 1925, a

of all armament.

At the same time, these very complexities and difficulties, as brought out in the preparatory commission, have clearly pointed out that a final solution for the problem of armament may not be immediately practicable. Indeed, at the latest meeting of the Council of the League Nations several distinguished esmen, leaders in the movement of the limitation of armament. to the limitation of armament sounded a note of warning against too great optimism of immediate

Commission's Valuable Work

The American Government be-

lieves that the discussions of the

lems presented, and in demonstrat-

ing the complexity and diversity of the obstacles to be overcome in the preparation and conclusion of a gen-eral agreement for the limitation of all armament.

too great optimism of immediate success.

The American Government is most anxious that concrete results in the limitation of armament may be achieved. The discussions of the preparatory commission have emphasized the fact that a number of governments consider that one of the chief present obstacles to the general reduction and limitation of armaments lies in the independence of land, sea, and air armaments, and in the consequent impossibility of reducing or limiting one of these categories without dealing simultaneously with the others.

Peace Question Involved

categories without dealing simultaneously with the others.

Peace Question Involved

On the other hand, the discussions have demonstrated even more emphatically that, should all effort to bring about the reduction or limitation of armament be conditioned upon the acceptance by all the world of a comprehensive plan covering all classes and types of armament, there would be little, if any, prospect of actual progress toward arms limitation in the near future.

The above difficulties must be frankly recognized. The American Government believes that they can be overcome and that they must be overcome, since the consequences of a failure to overcome them, and to make some definite, if only partial, agreement for the limitation of armament would constitute a setback to the cause of international peace too great to deserve serious contemplation as a possibility.

Admitting reluctantly that the existing political situations in certain parts of the world may render the problem of universal limitation incapable of immediate solution as a whole, the American Government believes that it is entirely practicable for the nations of the world and separate solution of such problems.

to proceed at once to the isolation and separate solution of such prob-lems as may appear susceptible of

such treatment, meanwhile continu-ing to give sympathetic considera-tion and discussion to comprehen-sive proposals aimed at the simul-taneous limitation of land, sea and

ditions.

The American Government believes that the adoption of such a course is the duty of the governments represented on the preparatory commission and that by so doing they will insure the achievement by the commission and by the general conference of concrete, even though perhaps only partial, results, thus facilitating progress toward the final solution of the general problem.

America's Minimum Strength
The American Government, as its
representatives on the preparatory
commission have repeatedly stated,
feels that land and air armaments
constitute essentially regional problems to be solved primarily by regional agreements. The American
army and air force are at minimum
strength. Agreement for land and
air limitation in other regions of the
world would not be dependent upon
the reduction or limitation of American land and air forces. Therefore
the American Government does not
feel that it can appropriately offer
definite suggestions to other powers
in regard to the limitation of these
categories of armament.
The problem of the limitation of America's Minimum Strength

categories of armament.

The problem of the limitation of naval armament, while not regional in character, can be dealt with as a practical matter by measures affecting the navies of a limited group of powers. This has been clearly established by the success of the Washington treaty limiting naval armament. The United States, as the initiator of the Washington conference, and as one of the principal naval powers, has a direct interest in this question, and, being both ready and willing to enter into an agreement further limiting naval armament, feels itself privileged to indicate a course of procedure which will, in its opinion, lead to such an agreement.

will, in its opinion, lead to such an agreement.

The discussions over a period of six months in Geneva have been most useful in the opportunity afforded for an exchange of views as to the general problem of naval imitation, and on the basis of these discussions it is feit that there is a posibility of reconciling many of the divergent views which have been expressed in such a manner as to meet the requirements of the naval upon acceptable measures of limitation.

GIFTS

About Naval Limitations It seems probable that under any circumstances the final conference will not be able to meet during this calendar year. The coming into effect of agreements reached by it might be delayed for a considerable period for a multitude of causes. Thepefore the American Government believes that those powers which may be able to arrive at an agreement for further naval limitation at an earlier date would not be justified in consciously postponing that agreement and thereby opening that agreement and thereby opening the way for a recrudescence of a spirit of competitive naval building—a development greatly to be deplored by all governments and peoples.

The American Government feels that the general principles of the Washington treaty offer a suitable basis for further discussions among its signatories.

Have You Opened Your Budget Credit Accountin the February Furniture Sale?

To see this furniture is to want it-it is so well made, it follows such authentically classical designs, it is so essentially the furniture of futurity. Perhaps you have felt that right now you did not wish to disturb present investments by further investments in your home-making, and so you have sighed regretfully and turned away. That wasn't necessary at all!

The Budget Credit Account puts this furniture of your dreams within quick reach of your income. You use and enjoy the furniture now, and you pay out of income during the months to come. Thousands have bought their furniture as they buy their homes, their bonds, their automobiles, and their insurance—that they like the plan is obvious, for so many of them come back year after year, as they add new furniture in the same way.

Learn of the plan at the Little Home that Budget Built, center of a great helpful service to home-makers. Here you will find aid on planning expenditures, on furnishing your home, on budgeting your income. And the results of years of research are interestingly summed up in the ninth edition of the Home Budget Book, just off the press, and yours for the asking, by mail or in person. Visitors from 32 States and several countries have already come to the Little Home since the sale opened—but the staff is adequate to any demands—it will treat your problem individually—and chances are that problem will be solved in a jiffy!

LISBON REBELS SURRENDER TO LOYAL FORCES

Portuguese Revolution Is Over, Says Dispatch From Foreign Minister

PARIS, Feb. 10 (A)-Portugal's latest revolution is over, says a telegram received by the Portuguese diplomatic representative here from the Minister of Foreign Affairs.

The Minister of Foreign Affairs.

The Minister of Foreign Affairs. The revolutionaries in Lisbon surrendered last night.

The rebels surrendered after being beaten in every quarter, and those who were barricaded in the arsenal fied.

The cruiser Carvalhao Araujo, which joined the rebels yesterday, was silenced by the shore batteries. The crew ran up the white flag and ook refuge aboard a German boat.

LONDON, Feb. 10 (A)-Surrender of the revolutionaries at Lisbon at 10:30 last night is reported in a Reuter dispatch from the Portu-guese capital this morning. The correspondent said the city was quiet and that order had been restored throughout the country. A large number of persons, including non-combatants, he added, were killed or wounded in Lisbon during the fighting between the insurrectionists and the loyal forces, and the property damage is very extensive.

Crews Disarmed The insurgents, who had en-trenched themselves in an arsenal, rrendered after 44 hours of intense bombardment from field guns and machine guns. To add to the dis-

and machine guns. To add to the discomfort of the revolutionaries an airplane dropped three torpedoes into the arsenal, doing much damage.

The revolution broke out in the capital at noon Monday, supported by naval men, a portion of the republican guard, police and a large number of civilians. The insurgents erected barricades in various parts of the city and the Government took of the city and the Government took energetic measures to crush the movement, ordering out all loyal de-tachments of the Lisboh garrison. who directed an intense machine gun fire on the insurrectionists.

By orders of the Government the

By orders of the Government the craisers whose crews wave suspected of favoring the revolt, were promptly disarmed. Thus, it is believed, Lishon was spared a naval bombardment. The insurgents had selzed the naval arsenal and the general post office, preventing news from leaving the capital. Pamage Extensive

Bombardment of the naval arsenal

Ceased at 10 o'clock last night, and the fighting stopped shortly after-ward. The Government forces com-pletely dominated the rebels, the dis-

OPPOSITION GROWS IN ENGLAND TO REVISION OF PRAYER BOOK

Many Influential Anglicans Describe Proposed Alterations as "an Outrage Upon Conscience"-Mass Meetings of Protest

movement of the Protestant evangelical clergy and laity of the Church of England opposed to the revision on the prayer book is tak-ing a more definite form with the announcement today of a manifesto "In those aspects which do concern Church of England opposed to the by the Council of the Church Asso-ciation calling upon all who would "maintain the principles of the Eng-MEXICO CITY, Feb. 10 (P)—The Secretary of Education, Dr. Jose Puig Casauranc, has denied the petition, of the National Teachers League asking closure of the for-Ireland . . and counteract the ef-forts to pervert her teaching on the essential points of the Christian faith," is backed by many influential Applicants

Anglicans.
The manifesto says: "The proposal that an agreement to the alternatives to be read into the subscription of our clergy to the present prayer book is an outrage upon conscience. The clergy have subscribed to the prayer book knowing it repudiates for example mass vestments, reservation and prayers for the dead, and no legislature is justified in enacting that in the future an acceptance of those things must be read into the solemn declaration wherein the clergy re-pudiated them."

Signal for Controversy

Its adoption, the council says, would be the signal for an outbreak of acrimonious controversy through-out the church." The allegation is also made that there was "no real

demand" for revision.

The Rev. W. A. Limbrick, general secretary of the Protestant Reformation Society said that it opposed "the Reformation settlement under the plea of revision and would feel bound to resist to the utmost of their powers. o resist to the utmost of their powers to resist to the utmost of their powers so immoral a proceeding as that of making error lawful, in order to placate and retain that section of the church who have, as the royal commission shows, so long defied the law and the bishops and set at naught the Reformation principles."

Mr. Limbrick said that he believed revision would denationalize the churcheand cause it to be known, as Bishop Knox termed it. a "church ecuive. Bishop Knox termed it, a "church with two vices."

tion of the ancient liturgy.
While the United Protestant Council, the National Church League, and other Protestant bodies today are planning a national campaign of pro-test, the Central Council of Catholic Societies was all day in session here and conferences of the council of the Gen. Carlos Ibanez.

isters sworn in. Whether the Chilean President, Emilio Figueroa-Larrain, will re-main in office was a matter of doubt this morning, the Executive not having made a definite announcement of signed yesterday and who was responsible for the resignation of the Cabinet last November, has urged the President to remain in office, and similar advice has been given by the heads of the Senate and Chamber.

ecutive.

Mass meetings of protest will be addressed by Sir Charles King-Harman, General E. W. Bank, Sir George Hume and other notables. The statement of General Ibanez Bishop of London's Views

The Bishop of London, interviewed in Brisbane. Australia, said that it was ridiculous to say that the revision meant a "move toward Rome." It was, he said, merely the restoration of the ancient liturgy.

While the United Professional August 1985 and 1985 a ministration he emphasized that he would seek to settle the Bolshevik problem in Chile once for all. The new ministry, which has been sworn in already is as follows:

Premier and Minister of Interior

rado Rios Gallardo, Liberal, a news-

rado Rios Gallardo, Liberal, a newspaper writer.

Finance—Pablo Ramires, Radical, formerly Minister of Education and ex-Deputy.

War—Gen. Ortis Vega, Inspector-General of the Army.

Justice—Aquiles Vergera, Radical, ex-Deputy.

Hygiene—Jose Santos Salas, once Labor candidate for president.

Agriculture — Arturo Alemparte, National Liberal, a member of the previous cabinet.

The ministeries of public works and nevy are still to be filled.

PARIS BALKS AT TANGIER CLAIMS

Hope Held That Contemplated Spanish Memorandum Will Be Modified

> By SISLEY HUDDLESTON By Special Cable

PARIS, Feb. 10-The Tangier conerence at present is in its preliminary stage and serious discussions will not begin for several days. Meanwhile, the delegates, having renewed cial conversations and, it is hoped as a result of lobbying, the contemplated Spanish memorandum will be modified. It is felt impossible to reopen the question which has been heavier with menace and has caused more international incidents than any other whole letters to Every state. whch interests Europe.

If Spain insists on its demand then france, though desirous of being conciliatory, is bound to be bluntly negative. The guiding lines of the instractions given to the delegates by Primo de Rivera are frankly inacceptable. Spain would have the sup-pression of the committee of control and would nominate the Mendoub for 10 years, not by the Sultan, but by the Caliphate of the Spanish zone.

Tangier, in an international sense, would be reduced to the town itself. The French administrator would be replaced by a Spanish controller. The Legislative Assembly would be nothing more than a municipal council. Spanish courts would be substituted for international tribunals. The Gendarmerie would be incorporated in the Spanish military

These claims, besides the request for a reorganization of the customs duties, are published here and described as contrary to the accords of 1912 and 1923. Apparently the French have not yet made counter propositions. Avenir states that it is essential that no concession be made which will place France in an inferior position in Tangier, for French interest in the whole of North Africa are extensive and vital. The African populations would not under-stand the diminished status of France and fresh difficulties might arise if France lost its appearance of

It is hard to see what purpose the conference serves unless Spain is prepared to take much less than it asks. The anti-Locarnists find the Spanish attitude a consequence of the refusal to give to Spain a permanent Council seat at the time of the entry of Germany to the League of Nations. Spain quitted

PRESIDENT DIAZ READY TO QUIT

Says He Will Resign to Aid Nicaragua Peace If the United States Wishes

NICARAGUA, Feb. 10 (P)—President Dias has announced that he is ready to give way to someone else, if that seems best to the United

"My interests, hopes and ambi-tions," he said, "are only for Nica-ragua, peace and progress and the friendship of the United States. If the United States should think it best that we give way to someone else as a means of furthering the best interests of Nicaragua, I should do so immediately. "So long as I am President, and

under subsequent administrations, I think the United States Marines should remain in Nicaragua. This is the only means of preventing revo-lutions and warranting uninterrupted progress of the coast-to-coast rail-road which I plan, paved highways,

progress of the coast-to-coat rairroad which I plan, paved highways,
educational systems allowing the
Nicaraguans to realize their natural
physical advantages, and possibilities
of development during peace time.
"I always opposed removing the
marines from Nicaragua, and I welcome their return to aid our nation."
The Consgrvatives now control
Chinandega, and the Liberals are reported to be in flight.
Telephone and telegraph communication has not yet been restored, but
a trial train successfully made the
trip from Corinto, bringing to the
capital business men who were
stranded in Corinto when Chinandega, an important point on the railway line, fell into the hands of the
Liberals.

LIRA DEFLATION TO BE CONTINUED

Fascist Government Maintains Policy-Lictors Loan Reaches High Figure

By Wireless

ROME, Feb. 10-After two cabinet meetings at which the financial and economic situation was fully ex-amined, a communiqué published stating the Fascist Government's in-flexible determination to continue the deflationist policy on the lines an-nounced by the Prime Minister, Benito Mussolini in his speech at Pesaro last summer, namely to raise the value of the lira by gradual stages, with a progressive reduction in the volume of currency and a corling strengthening of

Count Volni, Finance Minister an Count Volpi, Finance Minister, announced that the subscriptions of the Lictors Loan amounted to 3,074,972,000 lire, of which 2,385,038,250 had been paid up. This figure is not final, since the subscription lists for Italians settled in foreign countries will close at the end of March. tries will close at the end of March. The state, added Count Volpi, would The state, added Count Voipi, would soon be in the position to undertake on a larger scale discount transactions and advance money to the advantage of national economy. In spite of the crisis due to the deflationist policy of the Government, unemployment had not reached "exceptional proportions" and the num-

ceptional proportions" and the num-ber of the unemployed would diminish in the spring with the recommencement of agricultural and
other public works. The cabinet is
still greatly occupied with the high
cost of living and it was noted that
while wholesale prices had fallen 90
noints since Sentember no such reserves. while wholesale prices had fallen 90 points since September, no such reduction had been effected in retail prices. Accordingly, ministers of national economy, corporations and the interior had been instructed to take the necessary steps to improve any the necessary steps to improve such

APPEAL IS MADE FOR ARMENIANS

Syria Said to Offer Promising Refuge for Persecuted People

By Wireless from Monitor Bureau By Wireless from Monitor Bureau
LONDON, Feb. 10 — French Syria.

offers a new and promising refuge
for the persecuted Armenians from
Turkey. This is the statement of high
authorities at the Church Assembly
here last night. Dr. Philip Napier
Waggett, ex-missionary in Palestine,
said that the present year's task in
helping the Armenians was to maintain the work of rescuing individuals from captivity, so that the Armenian nation as a whole could take
care of itself if given a chance. There care of itself if given a chance. There is now a prospect of giving it this

opportunity.
In French Syria, he said, there was an opening for settlers and the French Government and the Syrian people had expressed a willingness to receive and protect a large number be settled as free people of Syria they could make their own living and carve out their own future. The cost would be at least £120,000. The French Government had promised £50,000, British societies £5000, and the British Government was being

asked to help but further public ef-fort was needed.

Lord Hugh Cecil in seconding the appeal said he earnestly hoped that the prospect of settling Armenians in Syria would be realized.

The Archbishop of Canterbury also supported it and the resolution was passed unanimously

"The Child Who Reads Is the Child Who Leads"

Benjamin Franklin, Abraham Lincoln, Daniel Webster-the list of those who have attributed their success to the influence of books that they read in childhood, would read like a roll of the world's greatest names.

Give your child the advantage of reading! Stimulate in him the desire to read! At the same time, be sure he has right reading, give him

My BOOKHOUSE presents attractively, reading of a high literary standard which children will enjoy and which will strengthen and build character. It gives children the very best stories and poems obtainable, selected from a wide range of sources by one who is "a writer, an edu-cator and herself a mother," and so graded that every child will find just what he needs at each step of his progress.

The Three Tests of Right Reading

In making her selection, Olive Beaupré Miller, the editor, subjected every story and poem to these three tests: 1. Has it literary merit? 2. Will it interest the child? 3. Will what it adds to the child's life be for his good? Does it present sound standards, is its spirit fine, its atmosphere helpful?

My BOOKHOUSE is now used in a hundred thousand homes. It provides children with reading which will give real ideas and ideals, enlarge their interests, their understanding of human nature and their perception of beauty. Six volumes, 2688 pages, most of them illustrated SEND FOR FREE BOOKLET

RADITION in selling has been thrown overboard at Rancho Santa Fe and land is sold only to those who can qualify. For this reason, Rancho Santa Fe is probably your greatest investment opportunity in California today.

Rancho Santa Fe is a 9000-acre community of income-producing orchard estates where successful families are building country homes. All city conveniences are present. There is every facility for enjoying rural life in a mountain-to-sea region endowed with Eden-like natural beauty and redolent of the romance of early California.

The project is backed by a subsidiary of the Santa Fe Railway. The manne ment is therefore not interested in making money from land sales, but in developing tonnage and traffic for the railroad.

Purchasers are required to make only a small down payment on the land, which sells at \$300 to \$450 an acre, but they must agree, and show their ability, to carry out an immediate program of development.

This program is controlled by us in all such important details as type of planting, architecture and landscaping so that as a complete whole Rancho Santa Fe will possess a character unique in the world's history. If you love beauty in nature and architecture, however, you will find our participation in the planning and development of your estate not a restriction but a joy and an inspiration.

Rancho Santa Fe assembled all of the capital and personnel necessary to make this the outstanding achievement in community building before a spade-ful of earth was turned. Over \$4,000,000 has now been spent in development. Some choice acreage hitherto reserved for special development, is now available. Mail the coupon below for full details.

Heads Literacy Campaign MAYOR QUERIES

Wants to Know Whose Advice He Shall Take in Land Award Case

Mayor Nichols, in a communication sent to the Boston Financ Commission concerning the damage awards for land taking in Dock and Faneuil Hall Squares for which Jo-seph Paul, a real estate dealer, will make a profit of \$111,992 according to the commission, asks it whether he should follow the advice of the Law Department, the city's real estate ex-pert and the Board of Street Commis-sioners and pay for the land or allow a jury to decide.

The Mayor asks the commission if it has conducted another expert

study equally as good as the city's. He reminds the commission that jury awards have usually cost the city far more than a compromise award. The mayor recalls the commishave made what it styled "an ex-orbitant profit" but says he is more concerned with "the element of real estate values and the possibility jury verdicts against the city." says that in going before a jury of this town, chairman of the special against the advice of the law depart ment he must "estimate the risk of higher awards."

He adds:

"One Dock Square case has been decided by a jury—that brought by Anna N. Barry, the owner of the property immediately adjacent to one of the properties concerned. In that case the jury rendered a verdict of \$148,294. This estate contained by 1450 square feet of land with a four of strory brick building 100 years old. The city took about one-half the lot The city took about one-half the lot The city took about one-half the lot The city took about one-half in court of the The city took about one-half the lot The cit

The building itself was assessed for \$22,800, but even estimating the building at an unusual figure of say 75 per cent over the assessed valuation, the amount of the jury verdict, if apportioned between the taking and the remainder, shows an apparent profit to Anna N. Barry greatly in excess of \$100,000. This, however, did not deter the jury from the very did not deter the jury from Bay.

the verdict as stated.
"Experience has shown that the city has suffered severe loss, from this policy. On the other hand, the Mayor must assume the responsibility of making these settlements upon the recommendations of municipal experts.

"Your reasons for disagreeing with the city experts may be sound but I have no means of judging what these reasons are from your communication. It will be helpful, therefore, if you will send me at your earliest convenience answers to the questions herein presented."

CUT IN RAILROAD TAX IS ADVOCATED

No Opposition Appears to Bill in Maine Legislature

A dear and the Order Sons of Zion.

PROMOTION GOES

TO MAYOR'S AIDE

Mayor Nichols has appointed William A. Fisher, one of his assistant secretaries, to be secretary of the Commercial, industrial and Publicity Bureau, of which George H Johnson is director. Mr. Pisher's salary in its director. Mr. Pisher's salary in the Secretary to the Mayor's traffic advisory board, the also manded precision, resiliency and the sund provided the secretary to the Mayor's traffic advisory board, the also manded Elipsian deep was acceptable for the Boston Chamber of Commercia of the Boston Chamber of Commerci

secured a fine continuity of style manner.

Gilda is a grateful and popular rôle. Its measures fell to Mme. Norena. She graced them with a delicate flexibility of silken voice, and with clear, free tones. She, as well as Mr. Bonelli, undertook to carry out her part in such a way as to display a logical development. She convinced the eye as well as the ear, and pleased both. In all, she made a charming and predible Gilda.

Over all the players, large and

Over all the players, large and small, Mr. Moranzoni held an au-thoritative baton. Ease and sureness marked him last evening. Orchestra and singers alike responded.

this thoroughness

Nevarthe Jivelekian It is a courageous performer who would attempt a recital on any one

of the 12 evenings which the music

patrons of Boston have dedicated to

the music drama, yet Nevarthe Shaghoian Jivelekian, soprano, drew a goodly number of friendly auditors to Jordan Hall last night, when she of tempi or nuances. They are, at best, but a reflection of the musical idioms of late seventeenth and early eighteenth century composers; songs to display a voice of not too dramatic

(lullaby), and "Vairi Zaghik" (wild flower) by Romanos Melikian, and the "Yerginken ambella," arranged by Gomidas Vartabed. In these songs Mme. Jivekkan did her best work. The voice was, siven free passage, producing tones which, in the lower register, were of a rich, satisfying quality, Had the text been supplied in an English translation, the performance would have acquired an added interest to those unacquainted with the Armenian language. Songs by MacDouell, Delibes, Siset and Verdi completed the program.

LEAGUE LITERATURE FOR SCHOOL WORK

In Mattapan, plans are being many for two new buildings, an intermediate school and an elementary. These will be in the Edmund P. Tileston District. The elementary school will be located between the school will be located between the school will serve the section west of Blue Hill Avenue toward the Hyde Park line.

A six-room addition will be built to the Grover Cleveland School, Charles Street, Dorchester.

WAYD ASSOCIATION TO MEET

men ane talked with had considence in the permanence and success of the League, that the people were hadin-ning to believe that the attenues were telling the truth when they cald it, would work to prevent ware, and that children were grawing up to ex-pect peace to continue.

BOSTON TO WELCOME LEVIATHAN SATURDAY

The Leviathan, Herbert Hartley, master, United States Lines flagship, for customary under-water repairs in the navy's dry dock in South

South States Shipping Board has announced that work on the liner here will be carried out under the direction of the Emergency Fleet's maintenance and engineering department instead of being award-ed to outside interests. The vessel will not be open to the public, since the work at this pert must be car-ried on with all possible speed to enable the Leviathan to resume the transatlantic sallings, the first being scheduled for early in Masch scheduled for early in Mar

BOWDOIN PROFESSOR OF PHYSICS TO RETIRE

BRUNSWICK, Me., Feb. 10 (AP)—Dr. Charles S. Hutchins, professor of physics at Bowdoin College, will retire at the end of the present college year and become professor emeritus. He came to Bowdoin in 1885 as an instructor and three years.

emeritus. He came to Bowdoin in 1885 as an instructor and three years later was placed in charge of the department of physics.

In 1914 he was elected a fellow in the American Academy of Arts and Sciences, an honor held by only 45 physicists in America at that time. He is credited with having made the first efficient X-ray tube produced in America, shortly after Roentgen's discovery was announced in Europe.

IN HARTFORD HOMES

HARTFORD, Conn., Feb. 10 (A) -A questionnaire put out by principals of schools in this city and which went to approximately 25,000 pupils disclosed that 9700 live in homes in which there is a radio set.

which there is a radio set.

This canvass was made in connection with a request that WTIC station here radiocast the correct time at 9 p. m. that parents might note clock time and obviate excuses for their children's tardiness at school the next morning by attributing it to slow timepieces.

WOMEN DEMAND

Connecticut League Takes Stand Against "Permissive" Jury Service

HARTFORD, Conn., Feb. 10 (Special)—Opposition to the bill which would make jury service on the part of women permissive was expressed in a resolution passed by the executive board of the Connecticut League of Women Voters at its monthly meeting yesterday. The league is sponsoring a bill which would make all women liable under the same terms as men, with additional exemptions, if desired, for women and children under 16. children under 16.

In the resolution the following reasons are set forth as prompting the opposition of the league to this

measure:

"This bill does not recognize jury duty as a function of citizenship, but would make it permissive and would require the registration of only those women who might

EIGHT WILLIAMS MEN GRADUATED

Seniors Completing Course to Get Diplomas in June

WILLIAMSTOWN, Mass., Feb. 10
(Special)—Eight undergraduates at Williams College completed their requirements for graduation this February, and will receive their diplomas at commencement next next June, it was revealed by Dean Harry L. Agard today. At the same time it was announced that 21 undergraduates have been dropped from the college enrollment due to low scholarship. Of this number, two were juniors, 11 sophomores and eight freshmen.

Dean Agard indicated that the small number of freshmen who were dropped compares favorably with the much larger numbers of previous years, and seems to point to the fact that the stricter entrance requirements for Williams are working selectively in the desired manner. Among those dropped are the presidents of the freshman and sophomore classes.

Of the eight men who have gradfirst and last

carr of Andover, and Arthur E. Sewell of Portsmouth were heard, the first and last favoring the resolution, the second indorsing Mr. Loring's proposal to graduate last June. The complete list of those who have completed the requirements for a B. A. degree are: Ford C. Carlisle of Ashtabuls. O.; G. Alfred Ciuett, Jr., of Troy, N. Y.; Preston P. Kellogg of Giens Fall, N. Y.; John H. Leach of Jamaica. N. Y.; Frederick D. Neilson of Wilmette, Ill.; Frank T. Nichols of Oyster Bay, L. I.; James B. Rosenwald of New York City, and Charles Loomis Smythe of Cleveland, O.

DR. ZIMMERN TALKS TO MAINE SENATORS

Outlines Plan for World Peace and what, if any, are the remedies for the conditions protested.

Mr. Carr said that the fundamental conditions are the remedies for the conditions protested. by Education

AUGUSTA, Me., Feb. 10 (AP)-The Senate yesterday was addressed by Prof. Albert Zimmern, on the work of the League of Nations Institute of Intellectual Co-operation, of

Professor Zimmern, who is the guest of Dr. Augustus O. Thomas, State Commissioner of Education and president of the World Federation of Education Associations, said he was not at all embarrassed by the fact that he is connected with a department of the League of Na-tions with which this country is not affiliated, for the work of the intel-

mary purpose of the institute is to effect an organization between the intellectual leaders of the world in order to do away with misunder-standing between nations and de-velop a system for diffusing knowl-edge, so that the learning of one nation may be made quickly avail-able to other nations.

VOMEN DEMAND

Rewtown, will discontinue operations in Stamford March \$1 and move to the Newtown Building, after which it will be known as Newtown Academy, one of the largest preparatory schools in the State, according to Raymond J. Kwasnick, school-

master.

The Massee School was unable to expand at Stamford because the terms of the lease prevented Mr. Kwasnick from carrying out alterations that would enlarge the school. he says. About 70 students attend the Massee School. Castle Ronald has 30 rooms.

School Will Teach How to Aid Child

Wheelock Course to Seniors Will Show Parents and Teachers Plan of Work

Technique of bringing about an effective co-operation of parents and teachers for the benefit of the child forms the theme of a special course to be given senior pupils of the Wheelock School beginning tomorrow. It is presumably the first time that such a course has ever been

only those women who might volunteer to serve.

"Such legislation would be analogous to the law which permitted women to vote only on school matters, and would fail to interest the majority of women.

It would be unfair to those women who were public-spirited enough to volunteer for jury duty.

"It might bring in a group of women wishing to serve for monetary reasons, and so discredit jury service for women.

"Finally, its passage would, in the opinion of the league, indefinitely delay action on the bill introduced by Senator Walcott, S. B. 195, which has received the indorsement of the Connecticut League of Women Voters in convention assembled."

TOCATE WITH TARAGE. organisation, and several chairmen of state committees, will explain the different departments of work undertaken by the organisation for the purpose of giving to the child a better

hance to develop the best there is in him.
Miss Lucy Wheelock, principal of Miss Lucy Wheelock, principal of the school, plans to give to each stu-dent who expects to go into the pro-fession of teaching a basis of knowledge to be used to secure the co-operation of home, school and community, and the information necessary to keep a parent-teacher association true to the highest ideals

ACTION ON B. & M. INQUIRY DEFERRED

New Hampshire Bill Taken Under Advisement

CONCORD, N. H., Feb. 10 (Special)
—Following the hearing yesterday
the legislative committee on railroads took under advisement the bill
calling for an investigation of the
policies of the Boston & Maine Railroad in New Hampshire.

Edgar J. Rich, former counsel for
the Boston & Maine; Clarence E.
Carr of Andover, and Arthur E.
Sewell of Portsmouth were heard, the
first and last favoring the resolution,
the second indorsing Mr. Loring's

vation of the through route of 75 years between Boston and Portland. Me., through Portsmouth. He admitted he was the author of the resolution, but said it had been prepared only after several conferences with

tals behind railroad management and control must not be forgotten. In the interests of good feelings he urged that Mr. Loring be invited to come to New Hampshire to present such evidence as the committee might ask him for. He argued that by so doing expense would also be eliminated, and that the investigation might not then appear necestion might not then appear neces-

SIMMONS ARRANGES

Simmons College Alumnae Asso-

made to accommodate 400. The class with the highest percentage of attendance wins an award.

The program includes speeches by Dr. Henry Lefavour, president; Sarah Arnold, dean emerita, and Jane Louise Mesick, dean; a report of the Alumnae Council meeting which is to be held the same day; class singing led by 101sa Badger '25, toasts by Verta Mills White '18, and soprano solos by Marjorie Soper Nash '16.

TEAMSTERS' COUNCIL ELECTS The Teamsters' Council of Boston held a meeting last night and elected John Donovan of Coal Teamsters' Union 68 for president. They indorsed the new wage and working scale agreement of the Stable & Garagemen's Union. Other officers elected were: M. J. Monahan, vice-president, Eugene Mehagen, recording secretary and N. J. Lannan, financial secretary-treasurer. financial secretary-treasurer.

LAW SCHOOL DINNER PLANNED the annual Boston University law school's senior class banquet, which will be held at the University Club on the evening of Feb. 24. Prof Frank L. Simpson will be the guest speaker for the faculty. Daniel L. Marsh, president of the university, will be a guest of honor.

The four new subjects which scouts may study are journalism, canceing, salesmanship and metéor-logy. The journalism course is designed to teach the Scouts to write advertisements as well as various kinds of news stories and editorials. The policy requiring training for

PUBLICITY FOR MAINE POTATO

\$100,000 Appropriated as a Starter for Campaign of Two Years

CARIBOU, Me., Feb. 10 (Special)

—The Maine potato, made famous by
Aroostook County, is to have its
worth heraided to the world through worth heraided to the world through the medium of printer's ink, and as a starter \$100,000 has been appro-priated for a two years' campaign. Of this amount \$75,000 is to be made up by farmers, potato ship-pers and other business men and property owners of the State, while the balance will be contributed by the railroads, fertilizer firms, ma-chinery firms and wholesalers doing business with Arosatche communic business with Aroostook communi-

The decision to raise this advertising fund was reached at a meeting held here under the ausmeeting held because committee of the meeting held here under the auspices of the potato committee of the American Shippers' Advisory Board. The plan of allotment of quotas for the different towns in the county was figured from the total number of acres of potatoes grown in that town, together with the total number of carloads shipped from that town. One standard by which payment is to be collected is a tax of 50 cents for each acre of potatoes and a tax of 50 cents for each car loaded by any shipper, no matter how or where any shipper, no matter how or where

coated.

The purpose of the campaign is to increase the consumption of pota-toes, which has fallen off since 1914, and to overcome adverse propaganda put before the public by manufac-turers of foodstuffs to take the place

It is asserted that the movement is not wholly for the benefit of the potato shippers, but primarily for the benefit of all the farmers.

Boston Asparagus Market Is Sought

Middlesex County Growers to Organize and Prepare Program of Campaign

CONCORD, Mass., Feb. 10 (Special) -Middlesex County asparagus growers are now working out a plan whereby "grass" grown within the county should be in great demand in the Boston market this coming spring. For furthering this plan, an spring. For furthering this plan, an asparagus meeting to which all growers are invited has been arranged in the vestry of the First Parish Meeting House, Lexington Road, Concord Center, on Thursday afternoon, Feb. 17, at 1:30 o'clock, under the direction of the Middlessex County Extension Service.

A group of aspäragus growers and County Extension Service agents have arranged a program that they believe will not only be interesting and instructive, but that will bring about definite action on the part of the growers to organize, to capture

TEXTILE LAW . REVISION URGED

FITCHBURG, Mass., Feb. 10 (A)campaign of education among textile workers in Massachusetts for All the persons behind the resolution wanted to determine, he said, was what the policy of the Boston & one shift was advocated by Mayor Maine is, who controls that policy, and what, if any, are the remedies for the conditions protested.

In a first relief conference to have the controls that policy is the property of the protection of waterways and in the state Department of Public Works, thereby reducing the number of commissioners from five to three.

mayor. "The best way to accomplish reforms in this situation is to let the working people know the kind of legislation which so-called labor leaders are putting on the statute books and hinder rather than benefit the working classes. Paid labor leaders are putting makers. They active the tenure of office or the rights.

Solution of the bill reported by the committee, Mr. Goodwin is amply protected by this clause:

"That nothing in this act shall affect the tenure of office or the rights. School committee and the petitioner, powers, duties and obligations of the school committee and the proponents to the Berger rate of Motor Vehicles or excellent and providing for statures of \$15000 and providing for statu ers are trouble makers. They actu-ALL-ALUMNÆ DINNER ally hinder those they pretend to aid and are actuated only by a desire to make a noise to justify their salaries.

Simmons College Alumnae Asso-ciation will hold its all-alumnae din-dicate that textile plants in the affiliated, for the work of the intellectual institute, he said, has had ner on Feb. 12 at 6 o'clock in the south can produce goods for 10 per the hearty support of the United States from the beginning.

He told the senators that the primary purpose of the institute is to made to accommodate 400. The class toward putting industry in this state setts, I believe, will go a long way toward putting industry in this state in a position to at least meet southern competition.

STANDARDS RAISED FOR SCOUT LEADERS

Simultanequaly with announce ment of the addition of four more subjects to the Boy Scout "curthe movement unless he has taken a course of atudy at the National Trainlevel the standard of efficiency of those who are directing the move-ment throughout the country, and to rive it the best leadership of any boy

peaker for the faculty. Daniel L. inds of news stories and editorials. The policy requiring training for Scout executives is expected to have a beneficial effect on the standards of the whole movement, although the present leadership of it is said to be as efficient as that of any boy organization in the country. The national training school which future leaders will be required to attend is located will be required to attend is located. (Special)—A road-building and improving program involving the expenditure of \$300,000 on the highways of Hampden County is now under consideration by the commissioners. WOMEN DISCUSS BILLS ABOUT JURY SERVICE

Discussion of bills to establish jury service for women attracted an at-tendance of about 300 yesterday be-fore the Judiciary Committee of the Legislature.
Mrs. Helen G. Rofch of the Massa-

chusetts League of Women Voters and Mrs. Leslie B. Cutler of the Massachusetts Council of Women pre-sented bills on the subject, and smong the speakers who supported them were Mrs. Emma Fall Schofield.

the Charlotte Cushman Club in Philadelphia, through whose efforts the club is being formed, are members of a committee to obtain a treasurer. Amongsuthers interested in the movement are Mrs. Alvan T. Fuller, Mrs. James Cunningham Gray, Mrs. Malcolm E. French, Mrs. Guy W. Currier, Mrs. Arthur P., Teele, Mrs. Charles Eaton, Miss Mabel I. Otis, Mrs. W. Arthur Bayless, Mrs. Marion L. Higgins, Mrs. Montgomery Gray and Mrs. E. E. Clive. Surroundings Like Home Surroundings Like Home The purpose of the club is to found a suitable club residence for actresses playing in the city, and has been undertaken by the Cushman Club in Philadelphia through Mr. Potts, at the request of the actresses themselves, who declare that there is a special need for such a club in Boston.

While stars are usually well provided for by the leading hotels, members of the supporting company often find it difficult to accommodate themselves comfortably, and have been subjected to much that was objectionable as well as to things inconvenient.

It was to meet just such condi-It was to meet just such condi-tions that the Charlotte Cushman Club was founded in Philadelphia about 18 years ago and that a second was opened in Chicago about two years ago. It is proposed that the Boston Club will carry out the same idea. The Hollywood Club in Cali-fornia is an outgrowth of the plan. In Philadelphia the club has ob-tained a fine old house. There are living and reception rooms, a library and writing room, a symnasium and

living and reception rooms, a library and writing room, a symnasium and practice room, as well as sleeping rooms. A hot drink and rolls are served at 9 a. m., breakfast is at noon, dinner is at 5:30. Supper follows the theater. Especial care is taken to have the food of excellent quality, well prepared and attractively served.

Where Stage Meets Patrons After the theater is a social time at the club, corresponding to the evening hours in the usual home. Groups come in from the theaters. Once a month or so there are after-noon receptions to patrons, when stars in town are guests, and actors and audience, accustomed to seeing each other only across the foot-lights, have opportunity to meet and greet each other, perhaps to form friendships. The great advantage of these contacts is the community of interests that are found to exist be-tween stage folk and those in the usual walks of life.

Many rooms of the club have been furnished by actresses. Some are memorial rooms. There are a Mary memorial rooms. There are a Mary Anderson room, an Ethel Barrymore room. Frances Starr has recently furnished a room and George Arliss has given a handsome fireplace to the house. Charlotte Cushman was born in the old North End of Boston. The fact that the city was once her home is recognized only in the naming of

is recognized only in the naming of a school for her, but it is an anti-quated building, almost ready to be abandoned. A club home for actresses named for her therefore seems especially fitting. increase in Number and

FORTY SCHOOLS ENTERED IN DEBATE

committee of the city of Boston as F. Fitzgerald, speaking before the Maine Preliminaries to Be legislative Committee on Cities, hear-Held on March 18

LEWSTON, Me., Feb. 10 (Specia!) Forty Maine high and fitting schools are to take part in the preliminary debates planned for the Bates Interscholastic Debating League on March 18 next.

These debates will be held in the various schools upon the question: "Resolved, That within five years the United States should grant independence to the Philippines." This subject was selected by a vote of the schools. Each team entered will mittee. He spoke of \$2,000,000 and \$3,000,000 appropriations and told the schools. Each team entered will have two speakers, men and women are eligible and the traveling teams will take the affirmative side of the question and home teams the negative. No post graduates, however, will be allowed to participate. As far as possible the member schools will be grouped in triangles according to their choice, distance and location governing these groups.

cation governing these groups.

The semi-finals and finals will be held at Bates College in Lewiston on dates to be announced, but probably on March 25 and 26. LOOM FOR WEAVING

men and women on the committee, who will devote their time and interest to school matters. Mr. Fitsgerald also urged the nine members that all sections, or as many sections as possible, might be represented in the committee. H. W.

been built in the United States. It through social activities. Edward J. is an entirely new product for the company. The machine has been given a complete commercial test. Clifford A. Ohnemus, vice-president; is an entirely new product for the company. The machine has been given a complete commercial test, it is stated, and has proved itself to such an extent that important orders for it are on the company's beeks. GROUP OF MEASURES Governor Fuller signed his first large group of legislative bills of the present session yesterday, approving 19 measures. Among them were bills requiring that political committees oks, representing a large amount consist of enrolled party members, authorizing the town of Saugus to acquire land in Revere for park use.

of business.

The loom weaves plush fabrics from the hairs of the Angora goat, and includes automobile linings, upholsteries and velours such as are used in portieres. Until now manufacturers of these goods have been compelled to buy their looms in Eu-

HAVERHILL MAY HAVE 'GOLDEN RULE' FACTORY

Approximately 40 New England cities were represented at the opening of a convention of the Eastern Association of Superintendents of Fire and Police Telegraphs at the Hotel Westminster yesterday. The group visited the Boston fire alarmher dquarters and the new Brookline fire station today. Edward A. Sullivan of Hartford presided at a dinner at the Westminster last evening which was followed by a round-table HAVERHILL, Me Feb. 10 (Special)—A "Golden Rule" factory may be established in this city in the shoe manufacturing industry if present rhans are put through Negotiations are now being conducted between local shoeworkers and execu-

tives with representatives of the T. R. Daley Golden Rule factory in Lynn.

The proposed co-operative factory movement started during the past week when a group of the employees of the B. E. Cole Company, who were threwn out of employment through the purchase of the Cole company business by the A. M. Creighton Company of Lynn, the Cole business being moved to that city, discussed the subject.

The proposition is still in its preliminary state, but with a nucleus of the shoeworkers interested and the Cole factory available for the establishment of the factory, it is believed that the project will gain considerable backing.

BETTER HIRING METHODS CITED

Commerce Chamber Hears of Gains From Studying Employees' Aptitudes

Industrial relations and personnel work in corporations were discussed this noon by Arthur H. Young of New York, in an address before some 500 members of the Boston Chamber

New York, in an address before some 500 members of the Boston Chamber of Commerce, at the assembly luncheon in the chamber building. Mr. Young's topic was, "Dollars and sense in Industrial Relations." He is an industrial relations counselor. Contrasting the hiring at random some years ago with present conditions, he said now an employment manager is appointed who has detailed knowledge of all jobs and foremen in the plant and an idea of significance to all concerned of bringing the right man and the right job together.

The old system means the haphas and if the right job together.

The old system means the haphas and if the right job together.

The old system means the haphas and if the right job together.

The old system means the haphas and if the right job together.

The old system of unfit mendand in the court of the cou

mental transfers and thus helps to regularize and extend the worker's amortunity for employment or to relieve a labor shortage.

Finally, it releases the foreman to attend to more important duties of productive work and that alone constitutes a big financial saving to the company. In regard to discharge, Mr. Young advocates a fair hearing with the possibility of a transfer to another department rather than immediate dismissal.

Improvement in employment methods is only part of a general movement to increase efficiency of industries by a more careful handling and

Improvement in employment methods is only part of a general movement to increase efficiency of industries by a more careful handling and arrangement of the human element, said Mr. Young. We are coming to realize that economies effected by improved machines and better production methods may be offset by losses which do not commonly appear on a balance sheet but which are considered and may be prevented. Plant publications, often considered a useless expenditure, have an important rôle to play in establishing a contact between men and management, he believed.

Drummond, is the subfuct of the recital which Miss Edith Margaret Smaill of the Wellesley College department of reading and speaking will give at Steinert Hall next Tuesday at 8:15 p. m. Miss Juliette Gauthier will sing songs of the habitant.

COURT METHODS ARE CRITICIZED

J. Dunton Sharman Speaks for Majority Verdicts Among Other Things

"Crime is today largely the child of our practice of law, and the laws, which are supposed to protect society from the criminal, are being too much used and misused to shield the criminal from justice."

With these words J. Dunton Sharman, attorney, criminologist and writer, summarized his discussion of "The Crime Factory" before the Boston Rotary Club yesterday. To remedy the conditions of the lax administration of criminal law, which he contended was as much a factory of crime as the criminal himself, Mr. Sharman advocated the acceptance of majority verdicts by juries, the of majority verdicts by juries, the requirement that juries render ver-dicts without leaving the court room, and the removal of the money in-

fluence.

It was the methods of court procedure and of the practice of law which Mr. Sherman found particularly con-ducive to the aid of the criminal rather than to the aid of society. The

that their compensation might be more equitable, and that the most able lawyers might always be in-

Justice Moves Swiftly

in Court at Cambridge While J. Dunton Sharman was presenting to the Rotary Club his views on the delays and legal circumlocutions back of which the criminal frequently hides, Judge Wilford E. publications awarded certificates of merit in the 1926 contest of the National College Press Congress.

The publications awarded certificates of house was bringing to a close a criminal trial of four men charged with assault, which in its conduct and its sentences varied from the

criminal trials. The sentences which Judge Gray gave these convicted men were 10 to 12 years in prison for two of them, and 7 to 10 years for the other two. Following the appeals for clemency on the part of the counsel for the defense, Judge Gray stated that he had instructed the probation officer te make an investigation to find everything that might be advanced in behalf of the accused. Mr. Ramsav reported to the court that he had been unable to find anyone who could

commend the four men.

Officials Say No Plans for Use Have Been Made

LAWRENCE, Mass., Feb. 10 (A)-The Arlington Mills of Lawrence, through Albert H. Chamberlain, treasurer, and Henry B. Emerson, chief engineer, yesterday purchased The Bachrach Associates, whose at public auction the main buildings of the now defunct Methuen Com-pany in Methuen. The price paid in open bidding was \$30,000. The Arlington Mills' purchase in-cluded water power and water

rights, water wave and water prights, waterways extending to Salem, N. H., three acres of land on both sides of the Spicket River, electric generators and steam power equipment, as well as numerous buildings.

Officials of the mill stated that no

Officials of the mill stated that no plans have been made for what use the buildings may be put to, the pur-chase being made principally to ob-tain the water power and waterways rights. Other parcels of lands and

price of the entire plant will reach to approximately \$75,000.

The committee in presenting the

ement resolution pointed out that more than 10,000,000 barrels of for-

eign cement have been imported, duty free, into the United States in

the last four years, representing a loss to American industries of over \$32,000,000.

REICH REFUSES TO MEET POLES

Dismissal of Germans in Upper Silesia Is Cause— Poland Makes Reply

By Wireless

BERLIN, Feb. 10-The anti-Polish the danger exists that the Reich will break off the commercial parleys with Poland. The German Governand this year, Herbert Turner has with Poland. The German Govern-ment has suddenly refused to send delegates to the conference with the Poles, at which the rights of German subjects in Poland were to have been ilscussed. The Germans declare that discussed. The Germans declare that they regard it as useless to continue parleys with the Poles since the latter have compelled four German factory managers to leave Polish Upper

In reply to this charge the Polish legation informed The Christian Science Monitor correspondent that three of them asked for permission to stay only until Dec. 31 of last year, which was granted them, and that the fourth received permission to remain until Feb. 15. Poland was not in the position, it was said, to permit the German managers to work there longer, owing to Polish unemployment, and it was pointed out that several hundred Polish orkmen and 25,000 Polish farm hands working in Germany were dis-missed and compelled to leave the ountry by the German authorities

The attitude of the new German Government is regretted in German industrial circles, who need the Polish market for their products. The Government, however, refuses as long as the Poles do not yield to German demands regarding the rights of German subjects in Poland. The commercial parleys with France may also be endangered, owing to France's demand that Germany levy the same duty on its wines as on Spanish and Italian wines, which the Reich declines to do.

In the meantime the Roman Catho-

lics have refused to take steps against Herr von Keudell, the new Minister of Interior Affairs, because they do not wish to endanger the Coalition Government. Herr Keudell has been charged with having ap-proved the Kapp Putsch, with having permitted semi-military nationalistic organizations to drill on his grounds and with having done other things which were taken as proving that he was apparently not friendly toward the Republic, of which he is now a

NEW YORK SCOUTS GOING TO CAPITAL

Busy Program in Connection With Anniversary Week

Special from Monitor Bureau NEW YORK—A Lincoln's Birthday pilgrimage to Washington, in which 2500 Boy Scouts of New York State will participate, has been planned as feature of the national Boy Scout anniversary week.

The boys will leave New York on the night of Feb. 11 and will pass a-busy Saturday in Washington visit-ing the Lincoln Memorial, the Washington Monument and the White House grounds, where they will be greeted by President Coolidge and will present him with a Boy Scout statuette. Later the boys will visit the Capitol and call upon Vice-President Dawes and Nicholas Longworth, Speaker of the House. A tiny log cabin will be laid at the

foot of the Lincoln Statue in Union Square on Saturday morning. The cabin is the work of members of Manhattan Troop 460, which is made of boys employed in the lighting

prints. "The Bridge Builders' Shop' is a purely industrial scene but so well is the light and shade handled and the effect of distance in the big and the effect of distance in the big shop is so captured that the photog-rapher has risen above the confines of the mechanical processes of his machine and has portrayed the charm of the scene with an artist's eye. There is human interest in such prints as G. L. Hobart's street scene, in Alice Austin's portrait of a child, and in H. M. Murdoch's portrait studies. There are some delightful Southern scenes made by Cansonette S. Emmons and views of Halifax by W. R. MacAskill. James A. Andrews, a well known amateur photographer

MOTOR INSURANCE LAW UNDER FIRE

Owners Tell Committee It Hurts Their Business

The compulsory automobile insurance law was attacked before the Legislative Committee on Insurance by truck owners at a hearing yesterday on a bill of Day Baker, representative of truck interests, which would limit the commissioner of insurance in fixing rates and making rules and regulations.

"Before the enactment of the law," said H. B. Church, representing a motortruck company of Bos-ton, "the insurance companies paid out 28 cents in claims for every dollar paid them in premiums by us. Today, under the operation of the new law, for the same 28 cents paid out by them we turn over to the com-panies \$3.50."

H. A. Hall of Somerville, another operator of a fleet of trucks, stated hat since the enactment of the statute his insurance costs have gone up

from 200 to 300 per cent.

James G. Moran, Senator of Mans field, chairman of the committee, said he felt it would be better to wait for a year to see how the law works before asking any change in it

BOSTON CITY CLUB OPENS CAMPAIGN

Goal of 1000 Members Set for Canvassers

Luncheon for 200 today opened the Boston City Club's campaign for 1000 members. Among the speakers this noon were Charles B. Bread, president, and Horace S. Ford, general chairman, who urged all present to get out and work in the campaign The club has formed 40 teams of Boston's financial, educational, and

professional men.

Mr. Breed pointed out the services and advantages the club offers business men and others in a "movie" skit in the club's auditorium following the luncheon, this noon. Henry H. Bond also spoke. Each membe of the teams has planned to see 2 prospects with the end in view that an interview by an enthusiastic member will convince those of the advisability of joining the club.

The first report luncheon will be held next Monday. Division commanders include Mr. Bond, Richard J. Lane, Paul A. Doten, H. Morton Hill, L. D. Seaver, John G. Cassidy, Arthur Crosley and Ernest S. Benton.

Special from Monitor Bureau NEW YORK, Feb. 10-Naion-wide doption by states of a statute similar to New York's Baumes Law as deterrent to crime is urged by E. M Allen vice-president of the National Surety Company, who asserts that since the law has been effective of Everett, explained that the bill

Mr. Gulld was also instructed to appear before the same legislative committee and oppose a bill said to be favored by Mayor Nichols, whereby the power of fixing hours for municipal and state elections would be transferred from the council to the Board of Election Commissioners. The commissioners, who are appointees of the mayor, determine, the hours for voting at primary elections.

Under the law providing for the action on loan orders, such measures now become effective if passed by a two-thirds vote of the council or automatically if unacted upon after a work with the correction of the so-called Baumes in troduction before the council. It was through this latter prevision that Mayor Nichols' loan order for more

for a felony, it would appear that there has been a reduction of 25 per cent in the number of burglary and robbery cases. There has been an even more striking reduction in the number of holdups reported."

WASHINGTON STUDIES RECLAMATION NEEDS

TACOMA, Wash. (Special Correspondence)—The most comprehensive program in the history of state reclamation has resulted from the Haven, has been sold to two Boston women, Mrs. Mirism Skinner and Miss Louise Hollander Scott, members of the faculty of a girls' school. The property, which includes a 23-room building and elaborately landscaped grounds, will be converted into a school which will be opened in the fall. Commercial, secretarial, and collegiate courses are

Barnes, director of conservation and develop ment, are elimination of wasteful uses and methods in logging and lumber manufacturing; a thorough survey and report on the Washington State's water resources; introduction of a definite program of investigation individuals and corporations in re- the committee chairman at the close individuals and corporations in re-claiming cut-over logging land and the co-operation of the State with Federal authorities in the construc-tion of reclamation projects.

SCHOOL TRAVELING EXPENSE BILL LOST

House Opponents Say It Would Encourage 'Junketing'

The Massachusetts House yesterday voted down the bill of Payson smith, state commissioner of education, to legalize the expenditure of school funds in sending superintend-ents or school officers to attend con-

ventions or visit other schools.

Opposition to the bill was led by
Maynard E. S. Clemons, Representative of Wakefield, on the ground that it would encourage "junketing" to all parts of the country and result in gradual increase of tax costs which in gradual increase of tax costs which it is important now to keep down. He was supported by Edgar F. Power, Clarence S. Luitweiler, John E. Beck and Andrew Doyle.

in New York the company's loases was designed to legalize what has from theft and burglary have been a general practice for years and only came into question as the re-sult of an opinion by the Attorney-General recently. John S. Derham and Frank K. Stearns also spoke for the bill. The vote was 92 to 5 the bill. The vote was 92 to 55 against ordering the bill to a third

eading.
The Committee on Harbors Public Lands reported a resolve for a continued study by the division of waterways and public lands of the establishment of a free port in Bos-ton, and a bill for changing the harbor lines along the Charles,

BILL IS PROTESTED

Opponents to Be Heard in **Full Next Tuesday**

Opposition to the bill to legalize rofessional sports on Sunday will be heard before the Legislative Committee on Legal Affairs next Tuesday morning, it was announced by of yesterday's session, in which the proponents of the bill submitted their case. The 'Rev. Martin D. Kneeland, representing the Lord's Day League, asked the committee to assign time for the opposition.
Advocacy of the bill was led by Judge Edward L. Logan of South Boston, a World War general and author of the bill, who claimed wide support for it. It would amend the laws which now permit amateur sports. Representatives of the Massachusetts Branch of the American Federation of Labor and of the Massachusetts Department of the American Legion reported those or-ganizations in favor of the bill. Judge Logan pointed out that the bill is only a permissive measure take effect in cities or towns which accept it either through their local officials or by referendum. He fur-ther explained that it would per-

\$92,000,000 Rapid Transit Program Gets Action by City Council

DETROIT, Mich., Feb. 10 (Special)

—A definite move toward the working out of a \$92,000,000 rapid transit
program for this city has been taken
by City Council with unanimous decision to submit the proposed Woodward-Fort and Grand River-Gratiot
subway lines to vote of the people
at the apping election April 4. A at the spring election, April 4. A three-fifths vote is required for au-

thorization of construction.

The resolution calling for the submission of the projects as the initial step in inaugurating rapid transit facilities is the outgrowth of a final recommendation by the rapid transit commission.

In a former report, following five years of intensive study of Detroit's transportation needs, the commis-sion had recommended the construc-tion of four subway lines at a cost for construction and equipment of approximately \$280,000,000. This plan was disapproved by both Mayor Smith and the Council as being too difficult to finance.

The construction cost of the two The construction cost of the two proposed lines is estimated at \$92,-211,100, of which Detroit's share will be \$81,981,000. The cost of equipment will be \$42,749,000, to be raised by trust equipment or other notes, not on the faith and credit of the city. These notes will be paid off from the revenue of the subway lines in the event that the plan of the commission is adopted.

The amount for construction of these proposed routes to be paid from general taxes would be \$22,145,-000, or 70 cents per \$1000 of assessed valuation leased on the 1926-27 valu-ation, according to Col. Sidney D. Waldron, president of the commis-

ation, according to Col. Sidney D. Waldron, president of the commission. Three-quarters of the construction cost to be paid by special assessments on property within a haif-mile of the suhway stations will average \$302,000 per route mile per year, say members of the commission, who point out that these assessed property owners will be fully-compensated by increased property values thus established.

Following adoption of this resolution, John C. Lodgs, president of the Council, asked that the commission undertake a study of the possible utilization of clevated lines over present railway lines running into Detroit. He believed that in some instances such elevated lines could be operated in connection with the proposed subway system, although as felt that complete electrification of tailroads running into this city would be necessary to accomplish this project.

"GAS" PRICE CONTROL WINS IN TENNESSEE

Senate Passes Measure and House Approval Predicted

NASHVILLE, Tenn., Feb. 10 (Special) — The Tennessee Senate has unanimously passed a bill providing for state, control of the price of gastine sold within the State. Governor Austin Peay thus has won the Arst skirmish in his campaign to pretect the citizens from what he terined "extortion" in his message to the Legislature.

the Legislature. This bill, an administration meas-This bill, an administration measure, is similar to one pending in the lower House. They would set up a State department to investigate the cost of producing and distributing gasoline with power to set a price which would allow a fair return and prevent unfair competition. The Governor predicts that the House will also adopt the program.

In ungling passage of the bill Sen-

In urging passage of the bill, Sen-ator A. D. McKnight, its author, de-clared that State control was necessary, both to protect the public and to protect independent oil companies corporations.

MEXICAN CURRENCY SHOWS IMPROVEMENT

MEXICO CITY (Special Correspondence)—The December report of the Bank of Montreal's branch in Mexico City, makes the following Then she said: "Whose Birthday statement concerning the economic situation in Mexico: "Business con-ditions throughout the Republic continue dull and unsatisfactory, you aren't a hero yet. What other with no immediate improvement in sight. Mining production is falling Jackie thought and thought, and

crease.

"A marked strengthening has taken place in the Mexican dollar which recently reached its lowest point on record of 46.30 United States currency to the Mexican gold peso. The Mexican silver peso also reached its lowest discount on record of 17 per cent against the Mexican gold peso. The discount is now 9.50 per cent and the Government, with the assistance the Government, with the assistance of the local banks, is taking steps to stabilize the exchange."

AVIATION CONGRESS CALLED IN MEXICO

Flying Is Planned

MEXICO CITY, Mex. (Special Correspondence)—In an effort to promote actively the development of commercial aviation in Mexico, a group of Mexicans has appropriate the depleted wood pulp forests now being drawn on to supply 5,000,000 cords a year, with expectation that 15,000,000 to 20,000,000 cords annually will be required by

cial character, are asking President Calles to act as patron of the convention. The announcement of the supporters of the congress stresses Mexico's special need for aerial transportation, since the mountainous character of the country makes difficult the construction and upkeep of roads. For Mexico, it is main tained, aviation solves the national problem of transportation. The following agenda has been out-

lined for the congress:

The general study of air routes 2. Commercial application of those

2. Commercial application of those air routes that the Secretariat of War and Marine may place at the disposition of civil aeronautics, and development of other routes.

3. Study of the commercial possibilities of the various air lines, from the standpoint of their utility.

4. Organization of societies and commanies for the exploitation of companies for the exploitation of

commercial air lines.

5. Study of any propositions that may be submitted by the Mexican Government for the aid and development of civil aeronautics in Mexico.

RELIGIOUS CLASS BILL LOSES BISMARCK, N. D., Feb. 8 (Special)—The week-day religious education bill met defeat in the North Dakota Senate by a vote of 33 to 16. The measure would have permitted grade schools to excuse pupils for not to exceed 90 minutes a week in the control of the sexual pupils for not to exceed 90 minutes a week in the control of the sexual pupils for not to exceed 90 minutes a week in the control of the sexual pupils of of the sexual pupil

Farm's Waste Stalks and Shells May Augment Paper Pulp Supply

Chemists Say-Research Fund of \$50,000 Sought

Congress of Aeronautics, to meet in by Cyrenus Cole (R.), Representathis city the latter part of February. tive from Iowa, in support of a \$50,-The sponsors of the proposed congress, which is termed here the first serious step ever undertaken in Mexico toward the development of aerial communications of a commercial character, are asking President hitherto waste products

Pentosans and Pentoses

The cellulose substances of many plants, known chemically as pentosans and yielding pentoses which in turn are sugars of certain chemical formulas, get their name from the five carbon atoms in the molecule and are the subject of the chemists' greatest hopes, Mr. Cole said.

Experiments in utilizing waste pentosans at the lowa State Agricultural College Ames Is have con-

tural College, Ames, Ia., have con-verted them into valuable products ranging from precious chemicals that were formerly worth \$100 a pound, to print papers and substitutes for

America's largest "crop" of waste products comes from the farm and the research conducted at Ames and described to Herbert Hoover has
been largely instrumental through
his help in getting the present appropriation, according to Mr. Cole.
One substance made is furfuraldehyde or "furfural," now being made
commercially at Cedar Rapids, from
oat huffs, but also capable of being
made from corncobs, peanut shells
and other wastes. It has many uses,
and has been recently reduced in
price by the new processes from \$20
a pound to 14 cents a pound, Mr.
Cole said.

Wide Variety of Uses described to Herbert Hoover has

Wide Variety of Uses exceed 90 minutes a week in that they might attend reliclasses.

This may be used for plastics, for the minutes, and experiments are being conducted into its

stairs eagerly. In one corner of the big, open attle was a pile of discarded magazines. Down on his knees he dropped, and was soon absorbed in hunting for pictures of Abraham Lincoln.

He found a splendid one of him with a splendid one of him

with an ax, splitting rails. He chuckled as he cut ft out. Among

some advertisements was a picture of a log cabin. Clip, clip went his scissors. That was where Lincoln lived as a little boy. Then this great tall man in a long coat with

lived as a little boy. Then this great tail man in a long coat with something about a debate written under him. He would do splendidly, only he must find a Lincoln head to put on him. And that horse and carriage. Oh, what fun! That was the President going to the White House. After lunch Jackie gathered his pictures together and took them to the playroom. Then came the fun of sorting them out and pasting them in the scrapbook. On the front page he put a picture of the American flag. When the last picture had been pasted in, he wrapped the book up carefully in tissue paper and tied a red ribbon around it. He wanted to give it to Grandma that very minute. But there were two reasons why he couldn't. One was that Valentine Day wasn't until tomorrow, and the other was that Grandma hadn't come yet.

But she came the next morning, and oh, what a jolly time it was!

and oh, what a jolly time it was! There were hugs and kisses, and kisses and hugs, and peppermint candies! Jackle could hardly wait until she got her things off. But he di.. In fact he waited until lunch time, and then put the package at Grandma's place at the table.

But Grandma was so exasperating.

"" "Oh'd and "Ah'd" and turned it this way and that was she felt it and tried to see through it, and her eyes twinkled all the time. At last she pulled the ribbon. Jackie watched her closely, and the queerest thing happened. A tear dropped from Grandma's eye, as she turned

est this happened. A tear dropped from Grandma's eye, as she turned the pages of the Hero Valentine!
"Why, Grandma, you're crying!" exclaimed Jackie. "I—I wanted to make you happy."
"You have, Jackie, you have made me very happy indeed, so happy that I couldn't help that tear. Abraham Lincoln is my favorite hero, and you have made this beautiful Valentine with your own hands. I love it more than anything you could have bought."

Jackie was still a bit puszled, but

Jackie was still a bit puzzled, but

Jackie was still a bit puzzled, but he turned the pages of the scrapbook hurriedly and said: "I left the last page hlank, Grandma. You could never guess why?"

"A blank? So you have, dear. Tell me what is to go there."

Jackie flushe⁴. "I—I want to be a hero sometime, Grandma." he stammered. "And—and I thought that when I grow up and do semething "ry wonderful, you might want to put my picture here on the last page, because my birthday is in February, too."

Grandma took Jackie's hand and gripped it hard. "Indeed, that page will be sacred to me," she said. "And we'll save it Jackie, until you are a hero."

unvete tonies

A Hero Valentine

orher," setd Jackie, then he cried out suddenly: "I watching his mother sift the flour for a cake. "I want to make a Valentine for Grandma, a hero Valentine. But I don't know and paste and acissors. But he needed pictures, also. Where could he get them? Ah, he remembered. The attic! He climbed the narrow states asserily. In one corner of the

mands for pulp, and the diminution of virgin forest supplies which have already made the United States practically dependent on Canada. Brought to Production Point

"Paper made from cornstalks has een found very satisfactory, so far as experiments have gone. To make the process commercially practical

is one of the aims of the present appropriation." he said.

"The outstanding present development in research into the industrial utilization of agricultural waste products," according to Dr. A. Marston, dean of engineering. Iowa State College. "is the development of the industry of making paper from cornstalks." Following seven years! research, he says, some grades of cornstalk paper have been brought to the stage of actual factory production.

Gartiner '27. or player in one game this season and went into the lead of the lead NEW YORK, Feb. 10 (P)—The pos-ibility that the major leagues may ut off relations entirely with the hree Class "AA" minor leagues— merican Association, International and Pacific Coast—loomed today as sequel to the present revival of the reft controversy.

ITHACA, N. Y., Feb. 10—Two triple ties exist in the Eastern Intercollegiate Basketball League as a result of Cornell University's victory over Columbia University, here, yesterday, 35 to 23. A triple tie for first place had already existed between University of Pennsylvania, Princeton University and Dartmouth College, but with Cornell's victory, yesterday, the last three teams, Yale University, Cornell and Columbia, are now tied for fourth place. The three leaders have won three and lost one while the last three have lost three and won one.

PROVIDENCE, R. I., Feb. 10 (Special)—A capacity house, watched Rhode Island defeat Boston here I to 0 last night, in the roughest hockey game ever played in this city. Wilfred Desy scored the lone goal on a pass from Morrison, after 9m. 37s. of play in the first period. It was the fift victory for the Reds in six starts against the Tigers.

Play opened slowly, but soon both teams were traveling at top speed. Providence had the better of the play except for occasional rallies by Contant and Clapper. The summary:
PROVIDENCE

Wilcox, Desy, lw

finally resulted in a victory for Greene, 17—18, 18—16, 18—15. Jandorf led at 13—9 in the final game, but the stubborn Scotchman persevered and finally came through victor by the sligheest of margins. The summary:

GOURLEY RINK STILL UNBEATEN

Several of the M. C. A. Bonspiel Events Are in the Semifinal Stages

WINNIPEG, Man., Feb. 10 (Special)

The seventh day's play in the thirty-ninth annual bonspiel of the Manitoba Curling Association saw several events brought down to the semifinal stages and only one rink, that of R. J. Gourley of the Winnipeg Strathcona. Club, could claim an unbeaten record after the full week of play. He has now reached the fours of the primary events, the Dingwall and the Birks, and even in the closed events, which do not count in the race for the grand aggregate, he has come out on top in every game played.

nake a good showing, and are still in the running for several trophies. terr Dunlop, St. Paul, provided some the running for several trophies. Kerr Dunlop, St. Paul, provided some of the features of the day, when hemerged successfully from two extraand games. In the morning draw he was on the long end of the score in the first 14-end game of the bonspiel, defeating Gunn of the Winnipeg Elmwood Club, 15 to 12, in the Walker Theater event. In the 1 o'clock draw, he advanced in the Hudson's Bay event with a 13-end victory over Oscar Dudley, of the Winnipeg Granite Club, by 10 to 8.

George Lablatt, Minneapolis, got into the 16s of the Walker Theater event by winning games in the morning and afternoon draws. He eliminated Wallace of the Winnipeg Strathcona Club, 12 to 6, and Bleakley of the Winnipeg Heather Club, by 9 to 4. Lablatt-was eliminated from the Eaton event for visitors*at noon by Forsyth, of Brandon in a close game by 12 to 11.

McLeed of Duluth, lost his morning same in the Kiewel event to Walkey.

by 12 to 11.

McLeod of Duluth, lost his morning game in the Klewel event to Walkey, of the Winnipeg Strathcona Club, 12 to 9, but came back in the afternoon for a win in the Hudson's Bay event over Ellerby of the Winnipeg Thistle Club, 11 to 10.

In to 8.

Lablatt fell an easy victim to Lowe of the Winnipeg Terminal Club, in the night draw, in a game which meant entrance to the eights of the Jerry Robinson event. The score card read 8 to 6 for Lowe, McLeod of Duluth, entered the eights of the Hudson's Bay event when he won a close game from McAskill, the strong Gladstone skip, 8 to 7.

KANSAS STATE RALLY FAILS BY ONE POINT

MANHATTAN, Kan., Feb. 10 (Special)—A desperate last-minute rally by the Kansas State Agricultural College failed to put it in the lead and University of Kansas won a clobe, well-played baskethall game here last night by a 35 to 34 score. The one-point lead taken early in the game by Kansas was soon overcome by an Aggie offensive which placed the score at 12 to 4 in favor of the losers. For 12 minutes the Kansas players were unable to make a point but with the substitution of C. F. Newland "29 for C. E. Gordon '27 and a later substitution of J. J. Hill '28 for Capt G. H. Schmidt '27 the winners' score started to mount

J. J. Hill '28 for Capt. G. H. Schmidt '27 the winners' score started to mount and at the end of the half stood 14 to 17 in their favor.

In the second half both teams started with a rush and the score was soon 30 to 23 with the University players leading. Here the Aggies braced and a free throw followed by basket by C. A. Byers, '29 and A. R. Edwards '28 tied the score at 30.

With seven minutes to play, Newland and Albert Peterson '27, made a basket apiece and Captain Schmidt added a free throw for the final score for the University. In the final minute of the game Byers, the Aggies' scoring ace, made two field goals in rapid succession to put the score at 34 to 35, when the final whistle blew.

N. P. F. A. IS MAKING RAPID STRIDES NOW

RAPID STRIBES NOW

LONDON (Special Correspondence)

Eighteen months' enthusiasm and hard work lie behind the hare announcement, made recently that the National Playing Fields Association, which is striving to provide facilities for play in districts where none or too few exist at present, has established 29. county branches in England and Wales and one in Scotland since its formed inauguration on July 8, 1925. Local branches have been formed, too, in Birmingham, Bristol, Bath, Hull, Gloucester and Norwich.

With the whole-hearted support of the press and the Football Association, the N. P. F. A. has also launched a successful appeal to private sports clubs to extend to elementary school-boys living in the vicinity facilities for playing on their grounds under supervision. The scheme has already been taken up by a large number of clubs all over the country.

"Thanks to the generosity of private individuals, and the co-operation of local authorities," states the secretary of the association, "It has already been instrumental in adding some hundreds of acres to the playing fields of the nation, in Reading, Edmonton, Oxford, London, Chester, Eristol, Stokeon-Trent, Liverpool, Norwich, Redruth, Purley, and elsswhere. Besides gifts of land, at has received valuable gifts of money for the purchase of land, including two sums of £20,000 and £3000 for Greater London."

and 2 5000 for Greater London.

RICHARDS' CHARGES DENIED RICHARDS' CHARGES DENIED

ST. LOUIS, Mo., Feb. 10 (27)—The Missouri Valley Tennis Association in an
official statement last night, denied recent charges of Vincent Richards, tennis
player, that a revolution was brewing in
Mid-Western and Western tennis organizations against the United States Lawn
trannis Association. Richards was refused
a 1928 national ranking as an amateur
on grounds of alleged professionalism.

ON HIGHER PLANE

International Association Is Formed in London

LONDON (Special Correspondence) handicapping a game of great poten-"Ping-Pong," the indoor sport of table "Ping-Pong," the indoor sport of table tennis, to give it its present more dignified title, would probably have gained long ago the recognition of its merit which has come tardily in the formation of national associations to codify the rules and standardize conditions of play, and—latest development—an international association to promote a teurnament on the lines of the Davis Cup lawn tennis competition. It came in with a rush of population.

distance is not recognized by the A.
A. U. It was Wide's first appearance in competition on an indoor track.
A smashing finish in the 1000-yard event kept Liloyd Hahn's string of indoor victories unbroken for the season. The Boston Athletic Association starfinished 10 yards in front of Ray Dodge of the Illinois A. C. in 2m. 164-5s.

Robert McAllister, New York, won three victories from Charles Bowman, Newark A. C. and Jackson V. Scholz, New York A. C. in the 50, 60 and 79-yard dashes. James Burgéss, George town University star, raced away with the 500-yard invitation Newark special.

COLGATE BASEBALL DATES HAMILTON, N. J. Feb. 10 (P)—Colgate University's baseball team will finished.

COLGATE BASEBALL DATES

HAMILTON, N. J. Feb, 10 (P)—Colgate University's baseball team will invade the middle west this year for the first time in the history of the institution. The Maroon meets the University of Menigan nine at Ann Arbor twice in May. The achedule: April 21—Manhattan College; 23—New York University at tan College; 25—New York University; 27—Clarkson College of Technology; 30—Bonaventure. May 6—Union College at Schenectady; 7—United States Military Academy at West Point; 10—St. Lawrence University; 13—University; 14—Shonaventure; 14—Syracuse University; 15 and 19—University; 16 Rochester; 14—Syracuse University; 18 and 19—University of Michigan at Ann Arbor; 20—University of Michigan at Ann Arbor; 29—Harvard University at Rochester; 21—Syracuse University at Rochester; 23—Syracuse; 24—Syracuse; 24—Fale University at Rochester; 25—Williams College at Williams College at Willia

of time.

At present, though, there are at least two separate codes of play in Britain, for the Welsh authorities, who have on their books some 3000 registered players, forbid the use of rubberfaced racquets and play for a game of 50 points up instead of the more usually adopted 21. In England, there is no regulation enforced and players employ all manner of artifices for imparting super-spins for the ball. In other respects—dimension of playing area, racquets, net, and weight of ball—conditions have been standardized.

Coach Explains Wide Interest in Sports

By the Associated Press

By the Associated Press

Bridgeport, Conn., Feb. 10

COLLEGE athleties are not overemphasized, but the present
nation-wide interest in sports is
largely due to the economic growth
of the country during the past 25
years, Capt. L. M. Jones, football
coach at the United States Military
Academy, said here last night.
"During the past 25 years," he
said, "the student and alumni
bodies of the various colleges and
universities of the country have
grown enormously and the logical
result is that interest in the affairs
of these institutions has also
grown."

Better roads and the abundance
of money, also the increase in the
number of autoembiles, have a
hearing on the attention given to
athletics, in his opinion.

cut it down to 15 to 12 when the gun ended the initial half.

In the second period Grinnell crept up to within three points of Nebraska with the score at 22 to 19, but Capt. C. F. Smaha '27 and T. H. Elliott '28 almost immediately gave the home team six more points and a good margin. Nebraska was poor on free throws, converting only six points out of 17 chances. Captain Smaha led the scoring with four baskets and four free throws. H. M. Coggeshall '29, Grinnell forward, was next with eight points. The summary:

NEBRASKA GRINNELL.

NEBRASKA

Brown, Othmer, If..., rg. Niblo, Davis Smaha, rf..., Ig., Rinefort, Fail Page, Elliott, c..., e. Davis, Niblo Holm, Lawson, Ig., rf. CANADIAN HOCKEY LEAGUE

Calgary Wins and Adds to Its Lead PRAIRIE HOCKEY LEAGUE

nation-wide interest in sports is largely due to the economic growth of the country during the past 25 years, Capt. L. M. Jones, football coach at the United States Military Academy, said here last night.

"During the past 25 years," he said, "the student and alumnite bodies of the various colleges and universities of the country have grown enormously and the logical result is that interest in the affairs of these institutions has also grown."

Better roads and the abundance of money, also the increase in the number of autoombiles, have a bearing on the attention given to athletics, in his opinion.

You will find a table tennis section, usually the proud organizer of a championship and more often than not repussemed in one of the leagues which abound all over the country. In Dondon, alone, there are at least three big leagues, supported by upward of 100 clubs. What have the billiards players and the skittles experts to say to this?

Moreover the game is played, and nowadays players are more supported by upward of 100 clubs. What have the billiards players and the skittles experts to say to this?

Moreover the game is played, and nowadays played seriously in most

people with easily-obtained, inexpensive recreation, and tend, if in a small way, to form a common ground of competitive interest for the masses of different nations.

NEBRASKA'S VICTORY

NOT A VALLEY GAME

LINCOLN, Neb., Feb. 10 (Special)—
The University of Nebraska basketball team defeated Grinnell College here last night, 30 to 22 in a game that does not count in the Missouri Valley Conference race. The Scarlet and Cream took an early lead and near the half the score was 15 to 5, but the visitors cut it down to 15 to 12 when the gun ended the initial half.

In the second period Grinnell College and the visitors cut it down to 15 to 12 when the gun ended the initial half.

HANOVER, N. H., Feb. 10—The election of Rockwood Kelth 28 of Worcester as captain of the Dartmouth College cross country team for next fall was approved in an announcement by the athletic council. Keith captained his freshman cross country team two years

THE C. R. CUMMINS CO. GENERAL CONTRACTORS

They Grinned When the Waiter Spoke to Me in French

-but their laughter changed to amazement at my reply

WE had dropped into Pierrot's for dinner-Pierrot's, that quaint French restaurant where the waiters speak nothing but French. Jack Lejeune, who boasted a smattering of French, volunteered to act as interpreter.

"Now tell me what you want to eat," announced Jack grandly, after we were seated, "and I'll 'parley' with the waiter."

With halting French phrases and much motioning of hands, Jack translated our orders to the waiter. Finally Jack turned to me.

"What's yours. Fred?" he asked.

"Virginia ham and scrambled eggs." I replied.

Jack's face fell. He knew that my order would be difficult to translate into French. However, he made a brave effort.

"Jambon et des-et des-" but Jack couldn't think how to say "scrambled eggs." He made motions as if he were scrambling eggs in a frying pan, but the waiter couldn't get what he was driving at.

"I'm afraid you'll have to order spmething else, Fred." he said finally. "I can't think of the word for scrambled eggs."

Everybody smiled-everybody except me. With great ceremony I beckoned to the waiter." II said. A chuckle ran around the table.

"Fred can't speak French, can he?" I heard a girl whisper to Jack.

"No-he never spoke a word of French in his life," came the answer. "But watch him. This will be funny. He'll probable give an imitation of a hen laying an egg."

A Tense Moment The waiter addressed me. "Qu'est-que vous voulez, Monsieur?" he

speak French like that?" "Why didn't you tell us you could talk French?" "Who was your teacher?" "Well, folks," I replied, "It may sound strange, but the truth is I never had a teacher. And just a few months-ago I couldn't speak a word of French."

"Quit your kidding!" laughed Jack. "You didn't develop that knowledge of French in a few months. I thought it took years to learn to talk like that."

"I have been studying French only a short while," I insisted. And then I told them the whole story.

How I Learned French

How I Learned French Without a Teacher

Without a Teacher
"Did you ever hear of the House
of Hugo?" I asked.
Jack nedded. "That's that famous
Language Institute over in London.
ian't it?"
"Yea," I replied. "They've been
teaching languages for over a century. Thousands of Europeans have
learned foreign languages in a surprisingly short time by their 'atsight' method."
"But what's that got to do with
your learning French?" asked Jack.
"You haven't been over there taking
lessons from the House of Hugo,
have you?"
"No, I couldn't go to the House
of Hugo, so the House of Hugo
cama to me." I replied quissically.

My Friends Looked Startled
"Here's what I mean," I said.

"Here's what I mean." I said.
"The authorities of the House of Hugo got together recently and decided to condense their knowledge of language instruction—their experience in teaching French—the secrets of their wonderful method into a course of printed lessons—a course which anyone could study at home.

secrets of their wonderful method into a course of printed leasons—a course which anyone could study at home.

"This course turned out to be one of the most ingenious methods of learning French ever devised. It was simply marvelous. It enabled people to learn French in their own homes, in an incredibly short time.

"I can acarcely believe it myself, but just a few months ago I didn't know a word of French. Now I can speak and understand French when it is spoken to me. And I didn't know a word of French. Now I can speak and understand French when it is spoken to me. And I didn't study much—just a few minutes a day. There were no laborious exercises to do—no tiresome rulas—no dull class-room drills. It was actually fun learning. Everything was so clear, so simple, so easy, Honestly, the Hugo 'At-Sight'French. Course is

the most remarkable thing of its Try It 5 Days FREE

Try It 5 Days FREE

This story is typical. You, too, can now learn French at home—quickly, easily, pleasantly—just as thousands of others are doing by the celebrated Hugo "At-Sight" Method. Twenty-four fascinating leasons, carefully planned. A most ingenious method of learning French. Whole generations of language-teaching experience in all the leading European cities are behind-this French course.

The wonderful thing about this simplified Hugo method is that it makes you your own teacher. At home—in minutes that might otherwise be wasted—you learn phrase by phrase, sentence by sentence, to speak the language correctly and well. To be able to speak French is 'decidedly a cultural attainment, and is recognised as such. Use those spare minutes to master French this fascinating Hugo way!

No money is necessary now. We shall be glad to send you the complete course FREE FOR 5 DAYS so that you may see it and judge it for returning the course without cost or returning the course without cost or colligation, or keeping it as your own and sending only 31 as a first payment, and thereafter 32 a month until the full price of 312 has been paid.

You are the judge. Simply return the

Doubleday, Page & Co., Deph. F-1722, American' Representatives of Music's Language Institute of London, Garden City. New York.

Please send me the Hago "French-at-Sight" Course in 28 lessons, for free stamination. Within 5 days will either related to course or send you \$2 at that time and \$2 each month thereafter until \$12 has been paid. I am to receive a capy of the French-English Dictionary without additional cost.

The waiter addressed me. Ce-que vous voulez, Monsieur?" he asked.

There was a pause. All eyes were on me. I hesitated—prolonged the suspense as long as possible. Then in perfect French I said to the waiter: "Donnez-mol, s'il vous plait, du jambon aux oeufs brouillés—jamben de Virkinie."

The effect on my friends was tremendous. The laughter stopped. There were gamps of amazement. In order to heighten the effect, I continued for several minutes to converse in French with the waiter. I asked him all sorts of questions—what part of France he was fromhow long he had been in America, and many other queries. When I finally let the waiter go, everybody started firing excited questions at me. "Yand! Waere did you learn to

Berlioz and the B. B. C.

Royal Albert Hadl. It was incomparably the most interesting concert of Mr. Van der Stucken Guest the month. More than a quarter of a century had passed since Berliox's masterpiece was neard for the only time in London, and no trouble had been spared now to give it a worthy

The British Broadcasting Corpor-Berlios in England. He had already produced the Requiem in Manches-ter, and thus brought to London his Hallé Chorus thoroughly acquainted with the work. Tudor Davies had been secured for the tenor soloist, and the National Orchestra of 150 performers had been reinforced by four brass orchestras drawn from the well-known bands, "Besses o' the Barn" and "Irwell Springs." It was an imposing array. The very vast-ness of the Albert Hall and the abnormally large orchestra required for national radio concerts ministered naturally to the composer's original intentions and became irradiate with his imagination. Many compositions, played under such circumstances, would be partially swallowed by hall and orchestra, so far the audience present were conaudience present were con cerned. Not so Berlioz. His music rose, filled, encompassed the great auditorium with its gigantic thoughts and images. The Albert Hall (musically speaking) was just big enough for the occasion.

Michelangelesque Quality Until one of Berlioz's great works has been heard under such spacious conditions the nature of his genius cannot rightly be gauged. For Ber lioz was big enough to calculate, use, and control the elements of size and weight of sound, as imaginatively and successfully as Michelangelo de-signed great spaces in stone and narble. It is not impossible that the Requiem owes some of its Michel-angelesque quality to the impressions Berlioz received when a stu-dent in Rome. Little as he liked that city, one sees that the seeds of this work must have been in his thoughts from those Italian days when he railed at the futility of Italian church

ment, Agnus Dei.

The actual performance occupied an hour and a half and went through complete silence from the audi-ce. The Hallé Choir sang with notable intelligence and attentive-ness to nuances. At the opening the voices did not absolutely unite in pitch, but they improved steadily ad their performance in the Lachry-osa and later movements fully substantiated the high reputation of northern choirs. Tudor Davies gave his solo in the Sanctus with clarionsweet voice and a noble reticence of style. The orchestra was more than adequate to all the demands upon it. There were a few small slips on the part of executants (as the too early part of executants (as the too early entry of a trumpet), and a few momentary failures (as the inaudibility of the three flutes in the first of the famous chords which they share with eight trombones in the Hostias). But these were trifling slips and did not impair the profound impression of the performance.

Other Items

The remainder of the program was less overwhelming but equally interesting. It contained the picturesque Overture to "The Corsair," the great scene of The Royal Hunt and Thunderstorill from "The Trojans," and the Dance of the Will o' the Wisps and Hungarian March from "Faust"—the Dance played with a delicacy and precision surprising in so big a band, while the Albert Hall echo gambolied effishly in the rear.

Among other good concerts of the week must be mentioned Gerald Cooper's Purcell program at Grorian

Cooper's Purcell program at Grotrian Hall, when Clive Carey, artistic and versatile singer, made a welcome ap-pearance on a visit home from Aus-tralia. At the Giuld of Singers and yers' concert, on Jan. 18, the ndall Quartet, not long back from an Empire tour, gave an extremely ensitive performance of Dohanyi's

London, Jan. 24

N JAN. 20, under the conductorship of Sir Hamilton Harty, the stupendous Requiem and other works by Berlios were performed at the British Broadcasting Corporation's sixth National Concert in the Royal Albert Hell. It was incompar-

Feb. 4 and 5. Frank V. Van der
Stucken served as guest conductor,
His program included Weber's
"Euryanthe" Overture, Tchaikovsky's
Symphony "Pathétique," Straws's
Symphony "Pathétique," Straws's
"Don Juan," and the Prelude to "Die
Meistersinger," by Wagner.
The occasion of these concerts
was quite as much a testimonial to
the conductor as a musical function. Mr. Van der Stucken was the
first conductor- of the Cincinnati
Symphony Orchestra, and held that
sposition until 1906. Since that time,
although he has used the orchestra
in the May Festivals, of which he is
director, he had not appeared at the
desk in a symphony program. At the
surgent request of Fritz Reiner, conductor, he was induced this year to
bring before the public a program
made up entirely of numbers which
he introduced to Cincinnati during
the first year of his incumbency as
conductor. The Weber overture was
the opening number on the first program of the Cincinnati Orchestra.

Mr. Van der Stucken has had an
immense following in Cincinnati for
years, and in his audience were many

piece by Homer, two fine Thayers, and a notable sketch of Carlyle by Whistler are perhaps the high-lights of the older school. An interesting opalescent Dearth, a smacking Bel-

of the orchestra, both for sentiment's sake, and in the hope of establishing a closer tonal unity among the choirs. His experiment in this regard was particularly successful in the placement of cello and string bass groups, and became noticeable in the playing of the "Meistersinger" loss of time is darkening reger's work and fame.

The remaining piece in Mr. Stock's scheme of art was Reger's beautifully performed and the music was well worth the trouble the orchestra took with it. But already the shadow of time is darkening Reger's work and fame.

F. B.

when must have been in the lower power of the state of the control of the control

the footights began. Thus the hoped-for "Straussian Bayreuth" at Vienna did not materialize.

A Small House Now Strauss has returned to the development of them with varied use of divided choirs and many novel instrumental combinations. The work was of considerable length, filling the whole of the program's first part. The overture to "Belfagor" is an exceedingly effective composition. Agreeable, indeed fascinating, was the transcribed music of four Old Dances written for the lute—all the stage, things were far from satisfactory. Insufficient rehearsal—one of tation of the ancient instrument in the flaws that had made Strauss' directorship, interrupted by extended Staatsoper and made his re-entry as conductor of "Elektra." A disgrace-fully small house attended to greet crisp pizzicato for the Galliardia and Saltarello, while for the "Bells of concert tours, so open to criticism—Paris" bell tones produced by the told in every scene, and the singers harp were deliciously accompanied by hushed violins. In the "Ber-gamesca" there is a free and effective privilege of so famous a composer to harp were deliciously accompanied by hushed violins. In the "Bergamesca" there is a free and effective use of the piano as an instrument of embellishment.

The symphonic poem "Pines of Rome" heard here for the first time, made a most favorable impression. Great enthusiasm was manifested by the audience, and as the conducted of the vienna opera—his aim to produce operas, and notably his own, in as brilliant and costly a frame as possible but with the allest. aim to produce operas, and notably his own, in as brilliant and costly a frame as possible but with the slight-est possible expense of effort and rehearsal—is unfortunately still in evidence. It will not, however, materially detract from the pleasure of Strauss' presence now that his func-tions are no longer those of a re-sponsible director but merely those of a conductor, for 20 nights each season, for the next five years.

Quartet in D flat. William Murdoch, was made up of Reger's "Romantic" soon to start on a continental tour, Suite and the Concerto for piano by produced at his planoforte recital a new Fantasie-Sonata by Roy Agnew, Heinrich Kaminski is not one of sprincipally the ease and fluency of York City.

design for a two-story street as a substitute for the proposed subway that Chicago has been talking about for the last 20 odd years. Mr. Weary that Chicago has been talking about of the last 20 odd years. Mr. Weary also designed a system of elevated capacity of streets by means of mulsidewalks.

Congestion is caused by the height of buildings. We have entered an era of super-skyscrapers. Thirty-five story buildings are becoming common; buildings of 60, 80, and even 100 or more stories are being erected or planned. Each such building is a city. It is a city built straight up, instead of straight forward. The mid-straight forward.

ers up-and-down cities.

And so we come to the question:

If skyscrapers are to go up to 60, 80, 100 or more stories, may not our streets go up to four, six, or even eight stories? Such has been the vision of many a thoughtful architect heer and there.

An Essayist's Open Confession

just as well.

thinker. Again and again, if I may

be allowed to vary my metaphor, I have set forth in the professional

style along the straight highway of

logic, determined to follow it to the

end. For a hundred yards or so, all

has gone well, and I have congratu-

blazed by Aristotle, paved by Des-

cartes, and trodden by Spinoza and

Kant and Hegel. I shall never leave

it now, for it lies straight before me

in the sun, and all wisdom is shin-

ing at the farther end." But then

there has come a wisp of bird-song

I started. Thus it turns out, and I have come to see that my thoughts

are incorrigibly vagabond, that they

like the wistful man in Boswell who confessed to Dr. Johnson that he had long tried to be a philosopher "but cheerfulness was always break-

. . .

Of course there are compensations,

which even the humblest amateur

may be pardoned for enumerating.

The thoughts of the professional

thinker, as they move steadily for-

ward along the straight highway,

foreseen, and so he is never sur-

prised. Perhaps he never learns how

negligible the highway is in compari-

able than any other kingdom.

Is an example needed? Ten sec-

may sometimes grow a little monoi nous. He can see only what he has

ing in."

N AMATEUR has at least this I go in looking for a syllogism it is advantage over the "profes- as likely as not that I shall be able If Love will only lead us ional," that he maintains his to find nothing but a sonnet; and Or if it's wild with Winter, humility without conscious effort, then, of course, I have to decide When, by dint of listening to no one else for several weeks, I have grown to think that I can play the plano fairly well, a Paderewski concert reduces me at once to a mood that Saint Paul himself would have approved. for I so home not at all puffed up. thinking of myself no more highly than I ought to think. A performance by a troupe of acrobats invariably makes me feel that I have spent my lated myself upon my resolution. "This," I have said, "is the route years to little purpose, and when I remember that Weston walked seventy miles on his seventieth birthday I cannot reasonably plume myself upon having done half that distance at half his age. Every nascent suspicion that I may at last be learning to write a little is instantly refrom the one side or the other, and I have taken, after only a moment's hesitation, the first seductive by-way leading toward that song. The by-way has led me to a wood-road and that into a sheep-walk, until at last I have found myself lying somewhere under a tree, completely happy and quite forgetful of the goal for which I started. Thus it turns out, and I buked by a glance at almost any page of Hazlitt's essays. Thus it will be seen, when I confess that I have been an amateur in many things, that I deserve very little credit for such humility as I have. The professional performances,

however, of those who are called Thinkers, with a capital T, fill me with a sense of abasement for which the word humility is quite inade-quate. All that I have heard and read wayside and dwelling in tents. I am about these superior beings convinces me that, although I have always been trying to think, I am in this field of endeavor not even an amateur but a bungling tyro. Imagine the professional thinker sitting down to his desk, at exactly nine o'clock in the morning, with his "data" before him. oms, postulates, syllogisms, en-memes, sorites, inductions and uctions, reductio-ad-absurdums, or and minor premises and dis-uted middles lie ready to his hand the tools of a skillful shoemaker. interrupts the steady tread thought. No will-o'-the-wisp y floats between him and his at-demonstrandum. He goes

done, and calls it a day. Words will not express how wonderful all this seems to me.

When I look into my own little thought-factory, how different is the situation I find there! Everything is at sixe and sevens and sothing is in its piace. In one dark and dusty corner lies a litter of mispelianeous facts, mostly useless, thrown down so neiter-akelter that I have long since abandoned hope of finding anything I want among them. On the work-bench liself are a few rusty arguments and still fewer concepts in an unfinished state, mingled with and overlaid by whims and recollections, hopes, reverles, caprices, and fdle sallies of the fancy. A single glimpse at the place is enough to convince anyone that no thinking of the professional sort can be done there. If

that a sonnet will serve my purpose If thorns—we should not heed the Yet certainly it is not for lack of If Love will only lead us rying that I have failed to be a We need not ask the way.

> If Love will only lead us-Will hear the prayers we pray In even the darkest midnight Our souls will dream of day, 'The thorn will know the blossom he night the morning's ray: We need not ask the way!

-FRANK I. STANTON, in The Atlanta

In Black and White

It turned into one of the London parks from a side street and at once the dark, frosted trees formed a background. And there it was, so lovely a picture in the early sunlight that something had to be done with it, and done quickly, for all the time it was slowly rolling away with a sweet jangle of the chains that harnessed the brave horses, and swung from the load behind in silvered links.

The horses were rough-maned workers, that tugged freely from their necks, and clanked their hugs feet in rhythmic melody. Their breath blew from their noatrils in clouds into the tight, hard air, and their dark coats steamed with the energy of service. Above them, high up, crouched the carter in an ancient khaki coat that was greened with wear and weather, a one-time mem-

quire, has gone still farther in dog-

matic assertion, affirming that Bibury is unquestionably the most

seem to him only moderate state-

The line of contiguous cottages

when one sees it reproduces on canvas.

These cottages, one fancies, should be set aside for the exclusive residence of children—so small they are, so redolent of Mother Goose and Alice in Wonderland, and only a hop, skip and jump from a chalk stream brimening with water pellucid as air and obviously intended for nothing but navigation by paper boats. The painters and poets have their grown-up notions of Arlington Row, largely impractical and tinged with sentimentality, but children would know best how to enjoy it.

ments of the truth.

Reliance on Truth

Written for The Christian Science Monitor

ized."

TT IS essential that mankind | boam and all Israel before Abffah should have something upon and Judah . . and God delivered them which to rely, something with which to combat the troubles and trials of everyday life, some dependable support in times of stress and strain, some means of comfort durents and strain are strain, some means of comfort durents and strain are strain and strain and strain are strain are strain as a strain are strain as a strain and strain are strain as a strain are strain as a strain and strain are strain as a strain are strain and such as a strain are strain as a strain as a strain as a strain are strain as a strain a ing periods of danger, difficulty, and power to array itself against good

Usually men begin by turning to material means for help; to the em-ployment of material remedies for will, or to the human sense of law, for the solving of their problems. all of which arise from a material sense of existence, Believing, as they usually do, that matter is real, that something higher, something better. So the search for God, Spirit, begins; and mankind commences to seek and to find the one and only real support, the only comfort upon which it is safe can scientific healing power be real-

In the records of Holy Writ we find that as the people were led away thought, scknowledging only the from reliance upon the one and only good, pure, and holy as the creations true God and began to worship false of God, praying earnestly and humbly idols, or to believe in a power for a fuller revelation of the Christ-superior to God, Spirit, trouble and spirit, turning away from the evidisaster overtook them. As they, dence of the senses as real and true, however, once more turned to the giving less and less power to matter God of their fathers, and put away or to the belief of mortal mind that from them the false concept of good evil is something to be reckoned with, and evil as resident in matter, they sounding the trumpet of praise and were unlifted, invigorated, and subtantially advanced.

lesson worthy of careful study. In fact that its enemies are flying away, if Chronicles we find Abijah occupy- or have fallen impotent and useless. ing the throne of David, and Jeroboam arrayed against him with double the number of Abijah's warriors. Abijah made a strong appeal to the VILLIAM MORRIS, who should was to ambush the army of Abijah have known, once said that by his larger force, completely cutting them off from retreat. Seemingly Abijah and his followers were . . and as the men of Judah shouted,

it came to pass, that God smote Jerobeautiful village in the world. A reader naturally refuses to credit these sweeping superlatives until he has seen Bibury. Thereafter they foundrymen, his puddlers and glass-blowers. The logical product of the country of his birth, he was the first sculptor who saw plastic beauty in the workman, the first to give labour, known as Arlington Row, which faces a small tributary of the Coine just off the main street of Bibury, has been famous ever since Leslie's picture of it was exhibited at the Royal Academy, about thirty years ago. It must have been painted thousands of times, for one soldom visits the place on a sunny afternoon without finding at least one painter en-

the precious baptism of art. . . . Having previously been taught drawing by Jean-Baptiste, Condrawing by Jean-Baptiste, Con-stantin, at seventeen, entered the studio of the florid, academic Fraikin in order to learn the rudiments of sculpture. During his three years with Fraikin the lad did little besides tend the fire with complet circumspection, keep the clay wet, and imbibe an utter loathing for the insipid elegance of the school then

instpid elegance of the school then in vogue.

An opportune commission to furnish illustrations for Camille Lomonnier's descriptive book on Belgium caused him to make a systematic tour of the region (the "Black Country"), and it was not long before he realized that he had at last found the field for which he had as the field for which he had so earnestly been seeking. . . One day in the Borinage, as he was passing the entrance to a mine he happened to catch sight of a group of workstinctively felt that the rhythm of their movements and the heavy yet supple elasticity of their bodies could be translated only by sculpture. So strong was his conviction, and so im-plicit was his faith in himself, that this man of past fifty suddenly gave up his career as a painter and began his artistic life afresh. . . Still he did not apend his entire time indoors nor underground. . . . He also went

was swiftly and surely destroyed. Today mankind is blessed with an opportunity to learn of God as divine Principle, the one and only law-maker and law-giver, through the teachings of Christian Science, which make Truth available and demonstrable to all, under every circumstance and condition, for every difficulty and discord. Truth is the mortal existence is real, and that all one and only real remedy for all the is at the mercy of so-called material ills of the fiesh, for error of every law, they turn to matter for a remedy from the very ills that material ually understood, intelligently and belief has imposed upon them. But faithfully applied, to gain correct sooner or later there is felt the need of something more, something which use dividing the affections between matter cannot give, which materi-Spirit and matter, Truth and error, ality cannot supply; and then there and then hoping for a scientific awakens a desire in the heart for solution of problems. Mrs. Eddy solution of problems. Mrs. Eddy writes in "Science and Health with Key to the Scriptures" (p. 167), the

OUR YOUNG FOLKS' PAGE

The Colors on the Ice Palace

By MABEL S. MERRILL

AZEL GRAY and her sister Robin were shading their while they peered through the window of the garden house. They could see the whole slope of the great snowy hill, with its towering ski-jump lighted from top to bottom. They had watched that jump all day, but now it was something else that was holding their attention.

"There!" exclaimed Robin in quick delight. "It's come at last!"

On the dark shoulder of the hill scores of colored lights had leaped forth, wreathed like strings of jewels over and around a big ice "palace," which had been standing there unseen in the shadows. It was an unusually fine one, built for the great winter sports carnival which was being held here. Today had been given up to the events of the junior members, the schoolboy clubs. The lighting of the palace was the signal that those events were over.

"Alister will soon be home, then, as hungry as a hunter," said the smaller girl. "Mother, may we have supper here in the garden house, where we can see what is going on?"

Watching the Ski-Jump

Brookline, Mass.

Dear Editor:

Since my letter was published in the Monitor's Mail Bag I've received a good many letters, and I've had the most fun corresponding!

It is very interesting to compare the school methods of Brookline with those of California, Indiana, with showers.

Mata states they can be they derived a trangely familiar.

"It's the Kangaroo Club song!"

"It's the Kangaroo Club song!"

"It's the Kangaroo Club song!"

The procession bore straight down upon the garden house and deposited their burden in front of the lighted door. It was Alister Gray, and the two who had been carrying him were Karel Howard and Verne Kilbourne, his neighbors.

"Here's your conquering hero!" shouted Karel, waving his cap at Mother Gray. "We'd never have beaten those fellows if Alister hadn't made us work like mules and then won four of the biggest events all by himself. The Arctic chaps were a lot too sure of themselves; that gave us

too sure of themselves; that gave us

amazed faces. "Well, well, where are your eyes?" He pointed to the roof of the ice

SAID I "THIS VILLAGE HAS NO USE FOR COP, OR JUDGE, OR CALABOOSE!"

those letters.

Janet A.

Mildred C. (14) of Westfield, Mass., and Betty C. (12) of Chicago would also like to receive letters.

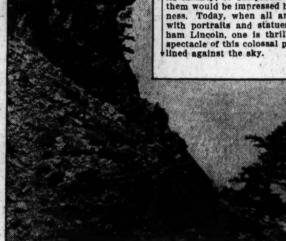

Janet A.

Mildred C. (14) of Westfield, Mass., and Betty C. (12) of Chicago would also of white light upon the colors and

HILE the ancient Egyptians were carving gigantic likenesses of the Pharaohs in the rock cliffs along the valley of the Nile, nature was at work sculpturing a heroic stone face in the cliffs above the Columbia River, in what is now the State of Washington.

It is said that the largest pyramid of Egypt was built in 20 years. Prob-

and the art of photography was in its infancy, so comparatively few of them would be impressed by the likeness. Today, when all are familian with portraits and statues of Abra-ham Lincoln, one is thrilled by the parently sincere talk, seem to ob spectacle of this colossal profile, out-lined against the sky.

The Stone Face Above the Columbia River.

The Raven and the Prospector

birds sing their merry carols, and the cougar or mountain lion slinks and crawls among the brush and rock. crawls among the brush and rock. These are the surroundings of the home of the prospector whose business it is to seek the rare minerals of art, platinum, gold and silver, or the more common metals of industry, such as copper, lead and iron. To this cabin there came one summer a young rayen.

this cabin there came one summer a young raven.

When the raven was first noticed by the prospector he was feeding on the garbage pile and would fly away hurriedly at his approach when he came home at night. For want of a companion of some kind the prospector dec'ded to try and make friends with this big awkward black bird. So he put out dainty morsels of food in convenient places where the raven could find them easily, and by never approaching hurriedly or scar
call. Thus real friendship was established between the man and bird, and the monotony of solitary camp life broken.

The prospector had no need of an alarm clock, for every morning at the raven would alight on the roof of the cabin with a loud thud, and caw and cr-r-k until the fire was started and the smoke rolled up out of the chimney, when he would fly to a near-by tree and watch the cabin closely, for every morning after breakfast the

In the heart of the Olympic ing the bird in any way, his confidence was soon won to a degree that he would stop in near-by trees and caw and scold. Then instead of the cabin is throwing the garbage on the ground, and graceful terns. The cabin is the would stop in near-by trees and caw and scold. Then instead of throwing the garbage on the ground, it was carefully put on an old tin plate and in this way the raven learned to eat out of a plate. Later, the plate was set upon a large wood-plie near the cabin door. Thus by degrees the confidence of one of the would stop in near-by trees and caw and scold. Then instead of throwing the garbage on the ground, it was carefully put on an old in plate and in this way the raven learned to eat out of a plate. Later, the plate was set upon a large wood-plie near the cabin door. Thus by degrees the confidence of one of the most timid and suspicious birds was won and greatly appreciated by the won and greatly appreciated by the prospector.

Growing Confidence

By means of much gentle whistling and talking to the bird, the raven learned not to fear the prospector but would come at the call of "Dicky," Dicky," or a whistle similar to a dog call. Thus real friendship was established between the way and bird.

the suffit stream. Except that it was a realistic profile of a masculine face, it was the suffit stream. Except that it was a stream and suffit stream. Except that it was a stream and suffit stream. Except that it was a stream and sufficient to the suffit stream. Except that it was a stream and suffit stream. Except that it was a stream and suffit stream. Except that it was a stream and suffit stream. Except that it was a stream and suffit stream. Except that it was a stream and suffit stream. Except that it was a stream and suffit stream. Except that it was a still stream and suffit stream. Except that it was a still stream and suffit stream. When young Lincoln reached man and sat on a tall stump near the subject stream it is enforced Wales is presidency. We within any own of the subject which subject with the application of the time, was allied with subject with the application of the constitution of the subject with the application of the constitution of the constitutio

ject to the journey. After a mile or more of this performance the raven would return to the cabin. It was wonderful, the remarkable degree of confidence this bird displayed, even when surrounded by dozens of other ravens that wo d not come After several weeks of this friendship, there came three moun-tain climbers from the city, who stayed several days at the cabin During their stay the raven went away and never came back again away and never came back again, and the prospector mourned for his lost friend and companion. But one day as he was going to town, several miles from the cabin he saw a raven that was very talkative and friendly. This mer have been his old friend, for no other raven seemed half so tame and friendly as this one.

this one.

This instance of friendship between bird and man readily recalls the story in the Bible where God commanded the ravens to feed Elijah by the brook Cherith.

extraterritorial rights, it resents the fact that it does not control its own customs, and that foreigners from certain countries (those pos-sessing extraterritorial rights) are sessing extraterritorial rights) are to some extent exempt from the authority of Chinese law. The Chinese maintain that they are capable of controlling their own customs and of dealing justly with the nationals of other countries—though this, of course, remains to be proved.

The western powers have recognized that there is much to be said for the Chinese point of view, but negotiations with China have been rundered difficult because civil war is still being waged between the Peking and Nationalist governments and there is no one central Chinese authority. With whom should they received the some step of the same type as that used for the famous North Pole flight, only larger, is being built for the occasion.

and there is no one central Chinese authority. With whom should they negotiate? Fortunately this difficulty has been solved, at least tempora-rily, because both the United States and Great Britain have decided to approach both of the contending parties.

On Jan. 26, Secretary of State Kel-logy declared that "the Government

logs declared that "the Government of the United States is ready now to continue negotiations on the entire subject of the tariff and extraterrisubject of the taria and extractivariality, or to take up negotiations on behalf of the United States alone." And on Jan. 29, Sir Austen Chamberlain, British Foreign Minister, submitted proposals, meeting most of the Chinese grievances to both the northern and southern authorities in Chinese

most of the Chinese grievances to both the northern and southern autorities in China.

One day at the prospector was coming home, he could hear the raven calling while flying in a circle high up in the air. The timber was very tall and dense under which the man was walking, so the raven could not see him coming until he came into the clearing around the cabin. Then with many loud c-r-r-ks the bird made a very beautiful spiral dive, one that an airplane could not mittate.

The Raven's Spiral Dive

Folding his wings, he would fall apparently 100 feet or more through the air, and then with a loud c-r-r-k need.

Whenever the prospector went to town, the raven would fly ahead and sit on low branches of trees and logs, and with his funny but appoints, that these lads should be allowed to take an extended diploma course which will fit them for science

China Today

OU probably know that news from China has been causing considerable anxiety to those western nations which have interests in that country, and this because of the anti-foreign agitation which has been growing there.

The China of today is developing a strong national consciousness and a determination to assert its claims against western interference and domination. Its grievances are chiefly concerned with customs and extraterritorial rights. It resents the fact that it does not control its own customs, and that foreigners from certain countries (those posfrom certain countries (those pos-

EDUCATIONAL

Difference Between Schooling and Education—a Challenge third

By WOODBRIDGE N. FERRIS

United States Senator, Founder of Ferris Institute

Senator Ferris has been a feacher for more than half a century. In his early years a principal, a college president, and a superintendent of schools, at 31 he turned his back on the already settled middle West. Instead of following the brilliant educational possibilities there before him, he struck into the heart of the pine woods of Michigan to found a school for the lumberjack. The disappearance of the pine multiplied his difficulties, but he persisted with his institute where the rich man's son is not wooloome, but where more than 40,000 of modest means have gained an education. Ferris Institute is now in its forty-third year. The multitude of its graduates and their loyalty to their president contributed considerably, it is felt in Michigan, to Mr. Ferris's election twice as Governor of the State and later to the United States Senate. the State and later to the United States Senate. ROR nearly a decade the high trying to do the impossible. It is not

There is a vast difference between schooling and education. The physical equipments have rivaled in cost sometimes it is wise for us to inquire as to the motives of thousands and tens of thousands with think they must have an education. If the great student body could be induced to make a confession, we would find that a surprisingly large number of hese students and their parents ave concluded that through schools, a man or woman may be able to tallying without much work is motive finds expression in the left and encouraged. Through this co-operations to indeals, work would appear as motive finds expression in the left in 1926 has way through the great students to deal the content of the great of the content of the great student body could be induced to make a confession, we would find that a surprisingly large number of these students and their parents ave concluded that through schools, colleges and universities, the fine art of living can be encouraged. Through this co-operation to the surprisingly large number of large the surprising manual work with surprisingly large number of the surprising manual work with surprising manual work with surprisingly large number of living can be acquired without co-ordinating manual work with surprising the teaching of the surprising manual work with surprising manual work with surprising the surprisingly large number of living can be encouraged. Through this co-operation the surprising the surprising the surprising the s

Notwithstanding the teaching of American ideals, work would appear to be something to be avoided, or at least, something to be made easy.

Educators and preachers frequently profess a profound sympathy for Abraham Lincoln in his efforts to realize his best possibilities. It is my belief that Abraham Lincoln had chitive advantages, growing out of oblive advantages, growing out of is environment. It was the obstacles e overcame and his method of overng them that gave us the oin. His life demonstrates that ition is not confined to college

The tendency in educational insti-tutions is to make the pathway of the student as easy as possible. Of course there is no special virtue in poverty or in some of the obstacles which confront human beings in their efforts to "get on" in the world. This does not signify, however, that worth while education involves no obstacles.

worth while education involves no obstacles.

One of the greatest experiments attempted in America is now being garried on at Antioch College. Ninety per cent of the students do academic work for five weeks and then do manual labor in neighboring cities in industrial plants for five weeks. This provision enables the student to provide his own means for paying college expenses and at the same time enjoy an opportunity to develop certain elements of character which cannot be developed in the academic field.

lt is true that there is danger of making the earning of a living the primary end of education. However, we chall await with patience the re-sults of this great experiment at

Antioch College.

Again and again I have suggested its high school graduates that they should give themselves a convincing test before they go on to college. Parents are often loath to encourage this experiment. They are fearful that if high school graduates should go out and attempt to earn their, food, clothing, and shelter for one year, they might fail, or they might change their attitude toward a choice of votheir attitude toward a choice of vocation. Beyond a doubt, there are thousands in our high schools, who ought not to pursue a college course. There are thousands in our univer-sities who are not finding themselves

MANY public authorities in "ng-land are apt to scowl when the subject of gypsies is menthrough the training they receive. If tioned and these wandering people our high school graduates could be induced to make the test, many of our high school graduates could be induced to make the test, many of the parents and students would discover at the end of the year that to go on with an academic course would result in a waste of time and money.

An Experiment Advocated

I believe that a very large number of students in our higher institutions of learning should, at the end of the first year, be sent home, and then parents and guardians should reparents and guardians should require these allures in academic work to enter upon some business occupation and prove that they have real "backbone." Continuing in a university simply for the sake of family honor is a mistake if a year in productive work might change the mental attitude of the candidate. The higher institutions of learning should make every reasonable effort to persuade parents and guardians that a college training is not a wise provision for a large number of men and women who have no taste for books. A vast amount of mcney could be saved by relieving the higher institutions of learning from

The Speech Game for Younger Children

By MARJORIE GULLAN of the Polytechnic School Speech Training, London

N THIS method the child at every stage is learning to overcome sented therein, while all the time being encouraged to work toward in-dividual speech.

What then constitutes an ideal jungle for this type of work, for in this article I am dealing especially with the needs of the children under 8 years of are?

years of age?

I can best dilustrate this by giv-ing an example which won the high-est marks in a teacher's class in one of my more advanced courses, where the members had arrived at the point of working out the method in their own schools. I quote the jingle from my "Spoken Poetry in the Schools" (Methuen, London):

academic work, even in our negative schools, colleges and universities, the fine art of living can be encouraged. Through this co-operation thousands of youth could find a way to secure what is now heraided as an education.

It is reported through the newspapers that one-third of the graduates of Yale in 1926 had worked their way through the university. It is overhanging supervision.

Boys are quickly reached by the appeal of good citizenship, but they are not enjoy being consciously beginning and four more between each cock crow and the lines of the jingle. Every requirement was answered by this jingle. The words they are not kept conscious of an overhanging supervision. syllables. The rhythmic beat was atrong and obvious, and a great deal of fun and interest were created by the cock crow at the beginning and ond, which incidentally provided some valuable work in explosive consonants. Each little cock was in-vited to stand on his own hillock. and flap his wings lustily, but not so lustily as to make him breathless and so harm his speaking. In this fingle the children acting cocks can come out on the floor and speak only the cock crow, and those in the desks. can speak the lines, wagging an admonitory finger in time to the beat. It will be noticed also that the

> of each line.
>
> We often fail to realize that poetry like music has its silent beats, and it is the failure to recognise this which is the cause of our children rushing through their lines in the poetry lesson without any perception as to what the rhythmic pattern re-

re is a silent beat at the end

It will be noticed that this little ingle is distinguished for its powerful explosive consonants, such as "K" (hard C) and "D." This gives "K" (hard C) and "D." This gives the children a real chancs for the practicing of robust speech, rein-forced as every word is by a strong beat. The lingle is also valuable from the point of view of the prac-tice it affords in the vowels "O" and "OO" (in "crow" and "doodle doo!") —sounds which are often particu-larly badly propuposed.

larly badly pronounced.

A good jingle for our purpose should definitely contain:

Strong obvious rhythm.
 Simple words and ideas.
 Facilities for speech-training.
 Good descriptive qualities.

WALKING RHYTHM

Left hand balances tray on head, right hand swings the bell backward and forward to each strong beat, walking four steps at a time.

PRANCING RHYTHM Bell' hor'ses, bell' hor'ses, What' time' of day?' (') One' o'clock', two' o'clock', Three' and' away!' (')

Children form into groups of three, of which one is driver and two are a pair of horses. They all move forward, four steps to the line, the horses lifting the knees high in a prancing step, the driver stepping in ordinary fashion. All begin with the left foot. The driver cracks an imaginary whip with the right hand, making two movements of the ping in ordinary fashion. All begin with the left foot. The driver cracks an imaginary whip with the right hand, making two movements of the whip to each line. With the left hand he holds the two inside hands of the horses, which are flung back to him. The outside hand of each horse is put behind his own back, gripping the inner arm for steadying purposes.

Four strong beats to the line—children take hands and skip to it—four skips to each line. The teacher must be careful to speak the word "day" each time very carefully and clearly, of the form that of this article appeared Feb. 7.]

I append a few jingles illustrating a variety of rhythms, the strong the crack falls upon the two beats of which the children should just mark with the tips of their fingers in company with the teacher, and to which they should later make bodily movements.

WALKING RHYTHM

TIPTONING RHYTHM

Hick'etty, pick'etty, My' black hen', She' lays eggs' For gen'tlemen'. Some'times nine' And some'times ten'; Hick'etty, pick'etty, My' black hen'.

(Two strong beats in the line. Children tiptoeing in a circle, two steps to each line, black hen sitting in the middle, and flapping her wings—two flaps to each line.)

SKIPPING RHYTHM

Talent is not so much a special The value of the cracking of the gift as a removal of inhibitions.

GOOD BUYING IS NOTED IN INDUSTRIALS

Some Stocks Sell at New Highs—Rail Issues Irregular

NEW YORK, Feb. 10 (P)-The stock narket, which went through a period of spectacular movements yesterday, pened relatively steady today, with

the main price tendency upward.

Reading and Mathieson Alkali each opened about a point higher, and most of the other standard industrials and rails improved fractionally on initial

sales.

Failure of the Bank of England to decrease its rate cast a damper on the hope of traders who were expecting a cut in the New York Federal Reserve rediscount charge at today's meating.

meeting.

Speculative interest in the stock market switched from the rails to the industrials, with new high records being established in the first hour of trading by Baldwin, Crucible Steel and Producers & Refiners.

Good buying also appeared in such issues as United States Rubber, Allied Chemical, Houston Oil, Radio and United States Industrial Alcohol.

Stocks Higher Stocks Higher

The first sale of Wheeling & Lake
Eric common took place at 80, an
overnight drop of 10 poits, while the
preferred opened 4 points lower at 83.
Wabash and the Chicago Great Western issues also were heavy, with Chicago & Eastern Illinois preferred, one
of the few early strong spots in that
stroup.

of the few early strong spots in that group.

Foreign exchanges opened firm with demand sterling ruling around \$4.84%, and French francs around \$2.92 cents.

Bullish operations drifted into stocks which had not apparently been unduly exploited in recent hectic sessions, this accounting in large measure for the accumulation of purchasing orders in many new groups.

Notable gains were established by various chemical, farm implement,

various chemical, farm implement, sugar, motor and leather issues. sugar, motor and leather issues.

Commercial Solvents B jumped 8
points, and International Harvester almost 5. Remington Typewriter broke
5%, and the motion picture, baking,
and non-dividend paying rails continued to be supplied at intervals.

The standing rate on call loans was
maintained at 4 per cent.

Bond Trading Dull

In the face of nearly \$75,000,000 in new issues today the market for listed bonds was dull, and prices generally were soft. Further recessions were

bonds was dull, and prices generally were soft. Further recessions were scored against numerous popular securities, which have been moving regularly forward for several days.

Despite easy money conditions, there was only a light demand for high grade domestic issues, although there was a fair amount of buying in the Liberty group. Among the rails, lowa Central 5s and New Haven 3½s of 1955 displayed nominal activity, which was offset by selling pressure against Louisville &Nashville 7s, Chicago & Terre Haute refunding 5s and Northern Pacific 3s.

Aside from a point gain by Granby Consolidated 7s, little strength was shown by industrial or utilities obligations Empire Gas & Fuel sustained a set-back of more than 2 points.

Foreign bonds were irregular, German issues were in demand but other European liens fell off fractionally.

Prompt oversubscription was reported of the \$40,000,000 Associated Gas & Electric convertible bonds, the \$20,572,000 Chicago & Northwestern issue, and the \$7,500,000 offering for the International Railways of Central America.

DIVIDENDS

Middle West Utilities declared the regular quarterly dividend of \$2 on the
prior lien stock, payable March 15 to
stock of record Feb. 28.

Wamsutta Mills declared the regular
quarterly dividend of \$1 a share, payable
March 15 to stock of record Feb. 9.

American Sugar Refining declared the
regular quarterly dividends of \$1.25 on

Hamilton Brown Shoe Company statement as of Dec. 31, 1926, shows total assets of \$12.071.485, compared with \$11,-312,690 at the end of 1925. Current assets were \$10,426,371 and current liabilities \$4.175,008, compared with \$9,916,285 and \$31.176.18, respectively, in the previous year. Profit and loss surplus totalet \$2,765,652, compared with \$3,164,784 on Dec. 31, 1925.

DODGE ASSETS SHOW INCREASE

Equity Behind Preference Shares Gains More Than \$50 in 20 Months

A feature of the report of Dodge Brothers, Inc., for 1926 is the increased equity accruing to the 850,000 shares of \$7 preference stock, issued largely

of \$7 preference stock, issued largely against earnings.

As of April 1, 1925, they were carried at a nominal value of \$550,000, or \$1 a share, and represented an equity in assets of \$5,558,680, or \$6,65 a share. The \$75,000,000 of 6 per cent convertible debenture bonds covered the balance of tangible assets.

On Dec. 31, 1925, the preference shares represented an equity of \$48.

On Dec. 31, 1926, the preference shares represented an equity of \$48,-223,110, or \$56.85 a share. In 20 months the equity has increased slightly more than \$50 a share. This has been accomplished in two ways. The largest proportion of increase results from reinvestment of earnings. In the first eight months of the present corporation's operations—from April through December, 1925—surplus carried forward from earnings totaled \$9,841,969, and in 1926 fiscal year the total carried forward was \$15,729,420, making \$25,571,389, or more than \$30 a share, accruing from reinvested earnings on preference shares.

Bond Conversion

shares.

Bond Conversion

The balance of the increased equity resulted from the conversion of debentures into A shares. The \$75,000,000 convertible debenture bonds which were part of the original financing carried privileges to exchange up to \$30,000,000 into A stock on a silding scale in blocks of \$5,000,000 and at prices ranging from \$30 to \$70 for each A share.

The first three blocks, convertible at \$30, \$35 and \$40, and a small amount of the fourth block, convertible at \$50, aggregating \$15,025,000 bonds, have been converted, increasing the number of A shares to 1,935,023, from an original issue of 1,500,000, and reducing the outstanding total of bonds, including reductions through sinking fund, which amounts to \$1,000,000 annually, to \$55,405,500.

Through conversion \$14,981,498 has accrued as additional equity for preference shares, and is carried as surplus. Original surplus, plus surplus from carnings and surplus from conversion of debentures, brought the surplus account at the end of 1926 to \$47, 229,608

Although the A shares are selling considerably below the \$50 level at which further conversion of debentures may take place, former conversions have been important factors in strengthening the position of the preference shares, through increasing their equity in assets and reducing prior interest charges.

This results from the fact that bonds

equity in assets and reducing prior interest charges.

This results from the fact that bonds are carried on the books to represent full par or face value in assets, whereas the A shares into which they are convertible, are carried at a nominal value of 10 cents a share.

Therefore, when the \$15,025,000 of bonds were converted into 425,000 shares of Class A the difference between face value of the bonds and \$48,502, the capital book value of A shares, represented an accretion to surplus account.

Saving in Interest

There are still \$14,975,000 debentures

Saving in Interest

There are still \$14,975,000 debentures outstanding eligible for conversion into A shares at \$50, \$60 and \$70. For this purpose, 254,262 shares of A stock are reserved. Assuming all the eligible debentures converted, the additional equity for preference shares would be increased by \$14,949,573 or \$17,58 a share, and the number of A sharen outstanding would be increased to \$1,2189,285, with the corresponding reduction in outstanding bonds.

In addition to the increased equity for preference stock, which follow

for preference stock, which follow conversion of debentures into A shares there is a large saving in interest the ororas
The saving on bonds already conwerted amounts to more than \$900,000
annually, which means added earnings
of more than \$1 a share annually for

preference shares.
With all eligible debentures converted, annual interest saving would be \$1,800,000, equivalent to about \$2.11 a share on the outstanding preference

NEW YORK CURB CHICAGO STEEL PRICES LOWER

INDUSTRIALS

All Classes of Materials Are Weak-Rail and Structural Buying Heavy

CHICAGO, Feb. 10 (Special)-Pres sure for lower prices on heavy finished steel, following the recent \$2 reduction at Pittsburgh, has overcome whatever support producers have received in market on steel bars, plates and market on steel bars, plates and shapes is settling to 2 cents, Chicago. The new price is not yet general, applying to a broader list of preferred tonnage buyers, and small business still is being booked at 2.10 cents. A 2-cent basis at Chicago corrects the situation whereby neutral territory has been pushed back to the very gates of Chicago, and the relationship between Pittsburgh and Chicago will be restored.

ness still is being booked at 2.10 cents 2.12 stuation whereby neutral territory has been pushed back to the very gates of Chicago, and the relationship between Pittsburgh and Chicago will be restored.

The price situation has developed exceptional softness in the last week. In addition to the \$2 drop in heavy finished material all wire products except fencing are also down \$2. Iron and steel scrap is off 50 cents generally. Sheet prices have given \$1 to 2 during. It is believed fully half of the 1927 requirements for fastenings remains to be placed.

Rail mill operations have been increased several points. The Burlington order for 1000 cars and the 1836 to be built by the Northwestern in its own shops call for 35,000 tons of finished material.

Unusual activity marks the structural steel market. Pending work exceeds 130,000 tons, three jobs alone requiring 100,000 tons. Structural steel awards have been unseasonably high, and in excess of the corresponding period of 1926. Concrete bar awards, on the other hand, are lower.

Operations of steel corporations subsidiaries have been accelerated with the blowing in of another blast furnace at Gary, making 10 of the 12 steel works furnaces there active. For the Chicago district, 26 out of 36 steel works stacks are in blast.

Bar mills are operating close to 90 per cent. Sheet production will drop to 60 per cent. Sheet production will

New Issue

PROSPERITY IN CANADA SHOWS NO DIMINUTION

Basic Industries Well Employed-Building, Auto, and Paper Trades Gain

OTTAWA, Feb. 10 (Special)—Signs of increasing prosperity and industrial expansion in Canada are everywhere in evidence. Latest reports show further increases in automobile production and in the output of the basic bedustries. Construction is considerably ahead of this time last year and the pulp and paper industry is well employed.

employed.

An encouraging state of affairs is revealed in the Dominion Bureau of Statistics' survey of economic conditions during 1926, which has just been is ued. The survey discloses a record satisfactory progress in most lines. Attracting Foreign Capital

sued. The survey discloses a record of satisfactory progress in most lines.

Attracting Foreign Capital

Foreign capital was attracted on an increasing scale, the paper, power and mining industries reporting considerable expansion, which resulted in an activity in the construction industry unparalleled since pre-war times. The index of employment indicated that labor was engaged to a greater extent than in any year since 1920.

The three factors chosen as representative of the several phases of the economic situation in Canada showed diverse trends during 1926. The index of industrial stocks indicates that on the whole the Canadian exchanges were buoyant during the year. The increase in notice deposits in the banks was more moderate, but the substantial increases in October and November resulted in a new record for all time. The decline of whilesale prices during the year was an offsetting factor.

W. R. Campbell, vice-president and treasurer of the Ford Motor Company of Canada is responsible for the statement that the buying power of the Canadian public today is greater than ever before. Mr. Campbell said that investigation of economic conditions made to determine the production of the Ford Company for the current year, resulted in a decision to increase production 20 per cent.

Good Corporation Profits

Bank and company greports continue to reflect steady expansion in all parts of the country. The annual statement of North American Life showed an increase of \$11,007,000 in the capital stock of the bank, Net profits amounted to \$450,155.

At the annual meeting of the Canadian Mortgage Corporation it was reported that the assets of the corporation now exceed \$50,000,000, while only four years ago assets were \$40,000,000.

The Goodysar Tire & Rubber Company reports net profits for the year nided Sept. 30, at the record figure of \$23,245,541. This company is new operation in was reported that the assets of the corporation now exceed \$50,000,000, while only four years ago assets were \$40,000,000.

The Goodysar Tir

oo, an increase of \$44.185.885 over 1935.

January's market on the Montreal Stock Exchange saw a continuation of the buoyancy which marked trading in December, and while there was a slight falling off in the volume of business, the period was productive of a larger group of advances, and which were in a number of cases of an almost spectacular nature.

Bank Debits Gain

Further gains are shown in banking debits, the grand total in 1926 being \$20,355.90\$000, as compared with \$28,-126,000,000 in 1925, an increase of nearly \$ per cest. The greatest gain was effected in Quebec Province where the increase was 17 per cent.

Buyers in the took and steel market are emphasizing their hand-to-mouth policy by purchasing for immediate delivery, and at most for shipment over this and next month only. There has been hardly any interest shown as yet in second quarter requirements.

No. 1 foundry iron at \$24.80 Toronto, at which price business was done over the last week, is \$1 a ton lower than

ferential.

A new price list on steel and

wrought iron pipe, shows an average reduction of about 10c, cuts ranging reduction of about 10c, cuts ranging both above and below that figure. The non-ferrous metals list, on the other hand, is showing new strength. It is reported that the Canadian National Rallways is to ask bids on 1000 box cars, from Canadian makers.

Foundries at High Level

months.

The final figures of automobile production for 1926 show marked expansion in the industry. There were 205,000 vehicles manufactured last year, being the highest production ever recorded by the industry. In money value these motor vehicles represented about \$124,000,000. This

represented about \$124,000,000. This compares with an output of 161,221 units, valued at \$102,541,571 in the previous 12 months.

January, usually one of the offmonths for new construction contracts awarded, shows this year \$16,771,800 worth of new work. This figure is in excess of that for the first month of 1926 by 32 per cent. It is the largest January total since 1913.

Mining development in Northern Ontario continues to show satisfactory results. During 1926 the gold and silver mines of that part of the province disbursed in the way of dividends to shareholders amounted to \$12,000,000. This constitutes a new record.

ASTOR IS DIRECTOR OF GREAT NORTHERN

WASHINGTON, Feb. 10 (P)—Vincent Astor of New York City was given permission today by the Interstate Commerce Commission to serve as a director of the Great Northern Railroad, although Commissioner Eastman protested.

Mr. Astor is now a director of the Illinois Central, and under the law commission approval was necessary before he could serve on the board of another road.

Commissioner Eastman refused to

The preliminary statement of International Cement Corporation for 1926 shows net income of \$4,348,551, compared with \$3,976,335 in 1925. This is equal after preferred dividends to \$4,51 a share on 562,500 common shares, compared with \$3.03 a share on 560,000 common shares outstanding the year before.

ALLIED PACKERS, INC., LOSS

CITY OF BOSTON DEST

\$40,000,000

Associated Gas and Electric Company

51/2% Convertible Gold Debentures

Dated February 1, 1927

Due February 1, 1977

Interest payable February 1 and August 1. Redeemable on the first of any month on 60 days' notice at 105 and interest to and including February 1, 1932; at a premium decreasing 1/2% for each five year period thereafter to and including February 1, 1972; thereafter at 100/2 and interest to and including February 1, 1976, and thereafter at 100 and interest. Coupon Debentures in \$1,000 denomination, registerable as to principal only. The New York Trust Company, New York, Trustee.

TAX PROVISION: The Company will agree to pay interest without deduction for any present normal Federal Income Tax not exceeding 2% per annum which it may be required or permitted to pay thereon or retain therefrom.

For further information regarding the Company and these Debentures, attention is called to the letter of Mr. J. I. Mange, President of the Company, copies of which will be furnished on request and from which it will be noted among other things that:

Associated Gas and Electric Company, incorporated in 1906 under the laws of the State of New York, and its affiliated interests own, control or operate properties rendering electric power and light, gas, water and transportation service in territories having a population estimated to be in excess of 2,300,000. The present operating properties render public utility service to over 435,000 customers in more than 1,000 communities located principally in the States of New York, Pennsylvania, Maryland, Illinois, New Hampshire, Maine, Connecticut, Vermont, Ohio, South Dakota, Kentucky, Tennessee and Indiana, and also in the City of Manila, P. I.

Earnings: For the twelve months ended November 30, 1926, consolidated net earnings of the Company and subsidiary and affiliated companies, irrespective of the dates of acquisition, after deducting all operating expenses, maintenance, taxes (except Federal Income Taxes) and amounts applicable to minority common stocks, were, before provision for depreciation, over twice and, after provision for depreciation, over one and three-quarter times the annual interest on this issue of Convertible Gold Debentures and the prior annual interest and dividend charges (less credit for interest during construction) on such bonds and preferred stocks of subsidiary and affiliated companies as are to remain outstanding upon completion of this financing. The balance after deductings such prior annual interest and dividend charges was, before provision for depreciation, equal to over four times the annual interest on these Debentures. For the purpose of the foregoing calculations the interest charges on the outstanding \$12,527,707 perpetual convertible debentures and ontion was remained. of the foregoing calculations, the interest charges on the outstanding \$12,527,707 perpetual convertible debentures and option warrants of the Company have not been considered but for such purpose they have been treated as if converted into preferred stock.

The following statement showing earnings and other statistics of all properties now included in Associated Gas and Electric System, irrespective of the dates of acquisition, illustrates the substantial and uninterrupted growth of the properties:

	Earnings		Kwh.	Consumers	
Dec. 31	Gross	Net	Sales	Electric	Gas, Water, et
1921	\$20,595,193	\$6,433,557	282,514,860	178,725	102,500
1922		7,981,959	322,510,845	196,554	108,211
1923		9,611,306	388,566,189	226,920	111,612
1924		10,487,146	428,813,328	257,371	116,860
1925		12,216,887	500,035,656	285,715	122,277
1926 (November 30)	31,191,832	14,231,590	569,933,205	305,386	130,137

Over 85% of the gross operating revenues for the twelve months ended November 30, 1926; were derived from electric and gas operations.

Over \$20,000,000 of the proceeds of this issue will be used to further simplify the capital structure of the Associated Purpose of Issue: Gas and Electric System through the payment of indebtedness incurred in retiring bonds of the Company and bonds and preferred stocks of subsidiary and affiliated ocmpaies and through the retirement by redemption, purchase or otherwise of various other indebtedness and preferred stocks with interest or dividend rates of 51/2% or more, ranking senior to this issue. The balance of the proceeds will be used to acquire additional public utility properties or securities deriving their income from such properties, no benefit from which is reflected in the above earnings statement, for new construction and for other corporate purposes.

Conversion Privilege: These Debentures will be convertible, on terms and conditions to be set forth in the Indenture, on the first day of any month after February 1, 1928, up to and including February 1, 1933, at the option of the holder on ten days' notice into units consisting of two shares of Class A stock and one share of Common Stock, as said classes of stock are from time to time constituted, of Associated Gas and Electric Company on the following basis:

> For the first \$10,000,000 Debentures surrendered for conversion, at \$110 5,000,000 next 120 125 130 5,000,000 5,000,000 5,000,000 135 5,000,000 5,000,000

The consolidated capitalization of Associated Gas and Electric System (as of November 30, 1926, after Capitalization and Equity: giving effect to important financial changes to January 15, 1927, the issue of these Debentures and the contemplated retirement of indebtedness of the Company and indebtedness and preferred stocks of subsidiary and affiliated companies but exclusive of the participating stock of Clarion River Power Company) consists of \$104,964,933 subsidiary and/or affiliated company funded debt and preferred and common stocks; \$12,527,707 perpetual convertible debentures and option warrants; this issue of \$40,000,000 5½% Convertible Gold Debentures and also 2,364,404 shares of Preferred, Class A, Class B, and Common Stocks. Current market quotations for the Preferred, Class A and Common Stocks, and the estimated value of the Class B Stock, all of which are junior to these Debentures, indicate an aggregate value for these stocks of more than \$80,000,000.

We Recommend These Debentures for Investment

Price 95% and Interest, Yielding over 5.75%

These Debentures are offered for delivery when, as and if issued and received by us and subject to the approval of legal proceedings by our counsel, Messrs. Sullivan & Cromwell, New York City. It is expected that temporary Debentures will be available for delivery on or about February 28, 1927.

World Press

THE CHRYSANTHEMUM

Glasgow Herald: Although the chrysanthemum is first mentioned in the "Li-Ki" of Confucius, written about the year 500 B. C., it did not make its appearance in Europe until 1789. A few notices of its existence in Europe occur in the works of horticultural writers prior to that date, but there is nothing definite until the year of the French Revolution, when M. Blancard, a native of Marseilles, brought to that city three varieties. Two of them, however, soon died; but the third survived, and wa subsequently known as "Old Purple." A few plants of it were tent in 1790 too-Kew Gardens, the first of their kind in this country. During the next few years improvements were made and other varieties imported from China, until in 1824, for instance, no fewer than 30 varieties were growing in the Royal Horticultural Society's gardens at Chiswick. Two years later the number had increased to 50, and today there are hundreds of different varieties. make its appearance in Europe until

Detroit News: "A machine has been perfected to weigh words"— scientific item. And politicians will be astonished to know how little weight there is in the word I.

DIVERSIFICATION

Columbus Dispatch: A news item from Hattlesburg, Miss., states that a farmer drove into that town re-cently with a single truckload of pecans and sold the nuts for \$1100.

The price was 44 cents a pound. At this wholesale price, there is a fine profit in Gulf State pecan growing, and the Hattlesburg farmer doubtless drove back home in a very happy state of mind. How much better off he was than if he had followed the example of thousands of Mississippians and devoted his attention to cotton growing slone. This \$1100 truckload of pecans at Hattlesburg, as similar instances in many other places, points to the only sane and sure remedy for such cotton troubles as are brought about by a crop like that of the present year. That remedy can be stated in a single word—diversification.

Arkaneas Gasette: Ciri out our way says Bernard Shaw's whiak-ers look anything but Shavian.

Continental Can Company, Inc., for the year ended Dec. 31, 1928, reports not of \$3,734,184 after depreciation and fed-eral taxes, equivalent after preferred dividends to \$6.72 a share on \$00,000 shares of no-par common, compared with \$5,539,732 or \$10.81 a share on \$476,-\$652 shares of common in 1928.

J. G. BRILL BARNINGS GAIN

in Selectivity Is Achieved in Official B-D ering this feature will probably be run at some future time. We might say that this is the result of much research by Professor Chaffee of Harvard University, recognized as one of the real radio. **MOXF**, Kansas City, Mo. New Engineering Designs Give an Efficient

New Engineering Designs Give an Efficient

Podicaget Possiver Radiocast Receiver

By VOLNEY D. HURD

Among the needed changes in the advisable to use high voltages, in Among the needed changes in the Browning-Drake receiver probably the most outstanding is increased selectivity, due to the greatly increased congestion of the air lanes. A second need brought about through the increased popularity of power supply units, or B eliminators, has been the adaptation of this set to these devices. These two points, and greater simplicity are the features of the new Browning-Drake receiver.

Engineers some time this year which will completely cover the theory from a technical viewpoint. The easiest thing to say is that the sensitivity is increased and regenerations of the control of the co

Top View of Official B-D Set

This Photograph Clearly Shows the Relation of the Parts Used. In This Set a Very Deep Sub-Panel is Used, Giving Enough Space to Make the Set Builder's Task an Easy One and at the Same Time Keeping Large Amounts of Metal

Three elements enter into the selectivity increase. The first is the removing of the audio units well back, away from the coils. Maximum selectivity cannot be obtained when large masses of metal are in the main field of the coil. The bird's-eye view of the set shown in the accompanying photograph show how this bas heen accomplished.

most efficiently. It is the oblong set" or "this set" and each one has been published several times with all sorts of parts specified. We feel sure that the reader who constructs this new receiver will denser of the value of .00007. This is a distinct departure in grid condenser values, the size commonly used being .00025. The theoretical reasons for this change in size are quality. The next and last article in this series of three is by Mr. Brownshap has been accomplished. has been accomplished,

The two impedaformers as well as the tone filter have been moved well to the back part of the set and placed so that they are in the weakest part of the fields of the coils.

Another great step in the obtaining of additional selectivity, and based on this same idea of eliminating metal from the fields of the tuning coils, is the use of the new type Na-

tional condensers.

These are a radical departure in condenser design, being constructed along the frame girder idea used in structural steel work. Their construction was clearly shown in the accompanying photograph. The result at that great strongth is achieved with is that great strength is achieved with but a small amount of metal. The minimum capacity is much smaller than that of any other variable condenser of the same capacity that we the added reduction of metal in the coil fields is the second point which aids in selectivity.

The third and last is a new method

of neutralization. This uses the idea introduced by Mr. Browning in his factory-built receivers of last yearthe deliberate combination of a single inductance and a single capacity unit. In this new receiver, however, the balance is carried out independent of any of the elements of the detector stage.

It will be remembered in previous practice that the secondary of the R. F. transformer formed the inductance portion of the capacity inductance system. In the new capacity inductance or "C. I. system," as the writer prefers to call it, the antenna coil is used as the induc-tance part of the neutralization plan. This balancing of the R. F. circuit seems to have an added effect in increasing selectivity. The overall result of these three changes is an increase in sharpness of tuning estimated at nearly 50 per cent.

The last two years have seen im-pedance- and resistance-coupled amplification firmly lodged in the high estimation of the public. The great difficulty of either of these systems has been the difficulty of using a B eliminator with them without ex-cessive "motorboating" occurring when sensitivity or volume are de-

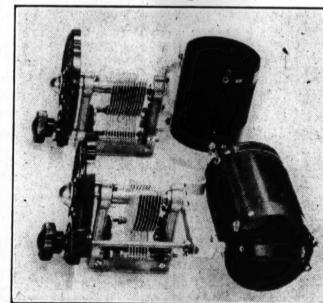

The amplifier used in this new The amplifier used in this new kit set very nicely overcomes this objection and maintains the fine tone quality of both these systems. The first stage uses an impedancemen. This is used as an impedance in the plate circuit of the detector, as it makes a much more actisfactory combination with the satisfactory combination with the new supersensitive detectors, such as the 200A, which are specified for use with this receiver. The use of this type of detector demands that the grid return be run to the neg-ative A rather than the positive, as s the usual practice with ordinary

tubes.
The second stage uses a regular resistance-coupled idea. The third and last stage uses the new National Third Stage Impedatormer, which is the usual impedatormer reversed. In this device a resistance is used in this device a resistance is used in the plate circuit of the second tube and a choke coil in the grid circuit of the last or power tube. This point is the solution of the problem of using this type of amplifier with a B eliminator. A choke coil at this point prevents the discharge effect known as "motorboating." This gives an excellent, stable audio amplifier.

Using the new power tubes, it is

will not attempt to go into them ing who will give the actual con-in this article. A special story cov- structional details.

In the Lighter Vein

"They say that airplane Dobbly invented is a great piece of

work."
"I hope he can keep up his good

WHY HE DIDN'T SELL Salesman: "In material and construction this car is far aboveanything at present on the market. For the price there is noth-

ing to touch it."

Prospect: "What is the price?"
Salesman: "Just a minute and I'll ask the sales manager.'

ACOUSTICS AND USHERS "They have excellent acoustics in this theater." "Yes, and they're so polite, too."—Life.

MONOPOLY HEARINGS

WASHINGTON—Announcement has been made by the Federal Trade Commission that hearings will shortly Commission that hearings will shortly be resumed at its offices in New York City in its case against the Radio Corporation of America and others in the alleged radio monopoly case. At these hearings additional evidence will be submitted in support of the commission's complaint in this case.

CHRISTIAN SCIENCE LECTURE Judge Frederick C. Hill, C.S., of Clinton, Ill., will lecture at First Church of Christ, Scientist, Jackson-ville, Fla., Feb. 11, at 8:15 p. m., eastern standard time, under the auspices of First Church of Christ, Scientist. WJAX will radiocast this lecture on 337 meters.

Registered at the Christian Science Publishing House

EDITORIALS

It is not often that The Christian Science Monitor can find itself in agreement with Dr. Nicholas Murray Butler, Dr. Butler Speaks

the militant wet who presides over the edu-cational activities of Columbia University. To for Liquor

one statement, however, in the defiant speech which he delivered to somewhat fewer than 100 Republicans in New York the other night,

we can heartily subscribe. Discussing the characteristics of the next Presidential nominee of the Republican Party, a subject in which he takes a lively interest, he said; "In 1928 no candidate for President can escape making known with definiteness and precision his attitude toward prohibition."

Thus far Dr. Butler speaks as one inspired with the truth: 1928 will be no time for pussy-footing on prohibition. The record of the past as well as easily observable present-day condi-tions in politics justify the statement that the candidate, on whatever ticket he may run, who antagonizes prohibition, will be ignominiously defeated. It is exceedingly doubtful whether any such candidate will be in the field. If he should be, it is however highly improbable that he will head the Republican ticket.

In his advocacy of the re-establishment of the liquor traffic, Dr. Butler sets up, very curiously for a professed Republican, the antiquated and discredited doctrine of states' rights. "The Eighteenth Amendment," he says, "must come out of the Constitution, and the states must each in its own way deal with the evils of the liquor traffic and the saloon. Those states that believe in prohibition can continue to try it until its folly is manifest even to them."

It is extraordinary to find a man of such unquestioned historical knowledge and admitted intelligent interest in American political history setting up so indefensible a doctrine as this. It is indefensible both from the viewpoint of expediency and that of constitutionalism. To have forty-eight different ways of dealing with the very intimate and vital problem of the liquor traffic in forty-eight different states, many of which are separated from each other merely by an imaginary line down the middle of a road, is utterly impracticable. It has been tried in some measure, and has failed. Dr. Butler is not an infant in politics. He knows very well that throughout almost half a century dry states were flanked by wet states, and the liquor trade, always corrupt and criminal, exerted all the resources of evasion and violation of the law to ship its product into the states which strove to outlaw it. He cannot have forgotten the Supreme Court's "original package" decision which led enterprising distilleries to put up their product in original packages holding just one drink. He cannot have forgotten the struggles from the first to pass an adequate law pro-hibiting the shipment of liquor into dry states, and thereafter to effect enforcement of that law. All these evils the distinguished educator of youth is willing to bring back if only prohibition may be nullified thereby.

Nothing is more clearly settled in American

history than the right of the Federal Government to enact and to enforce a law such as the one which Dr. Butler now urges should be nullifled. The states' rights doctrine, to which he would appeal, went down in the direful turmoil of civil war. It carried down with it human slavery, and we are not going to see it revived in order that the slavery of man to intoxicating liquor may come back with it.

Other portions of Dr. Butler's argument against this constitutional amendment, which was ratified by all but two of the states, and has been upheld in every test in the Supreme Court, are no more convincing. He asks that the nations should "learn from the example of inada, and adopt a system that will suppress the liquor traffic, abolish the saloon, promote temperance, and leave off invading the civil liberty of the individual and the violation of every fundamental law of God and man." But Canada has no general liquor law. The law differs widely between Quebec and Victoria, but in Quebec, to which Dr. Butler, if we recall rightly, repaired for an investigation just before the recent campaign in New York, the law neither does away with the saloon nor promotes temperance. As to what fundamental law of God is involved in the denial of the privilege of men to get drunk, we must leave it to Dr. Butler's conception of the divine direction.

How curiously that shrewd mentality does invert the truth! For example, as a protest against law enforcement he offers this extraor-dinary statement: "Already we have seen law enforcement lead to murder, and there appear to be no limits to which fanatics will not go to enforce the one single law in which they believe." Does it not occur to the doctor that it is the law violation, not the law enforcement, that leads to murder, and that there appear to be no limits to which those seeking the profits of illicit liquor will not go?

It is perhaps idle to argue with one so wedded to his Bacchanalian idol. But the wholly indefensible conclusions he has reached afford a new evidence of the curiously befogging effect of the championship of alcohol upon an otherwise alert and even brilliant intellect. On other matters of public interest Dr. Butler is often keen and stimulating. But in his consideration of the question of liquor he is as one blind because he will not see.

In what is, undoubtedly, a desire to protect all investors in real estate bonds and mortgages

in New York State, Attorney-General Ottinger Stricter declines to accept as an adequate insurance to Regulation the public the agreement of Realty which has been entered into by six of the larger Bond Sales mortgage bond houses,

and announced by Franklin D. Roosevelt, chairman of the American Construction Council. He insists that the agreement is inadequate and unsatisfactory because of the fact that instead of actually securing safety for the investor, the mortgage agreement referred to relieves the underwriting house from any accounting of funds intended for construction or for the payment of interest, amortization and taxes, and permits them to be used in the general business of the house, subject to whatever risks and speculations the house may engage in, "contrary to the purpose for which the public was invited into the investment.

In seeking to point out the weakness of the system of bond flotation which he has persistently attacked, Mr. Ottinger insists that the underwriting business houses, which under their contracts are merely engaged in selling bonds for a profit, have, however, invited the public to subscribe under the strong assurance of confidential and trust relationship between the brokers and the public, all of them uniformly adopting as a slogan the announcement that during their many years in business they have not lost a dollar of their patrons' money. But he attempts to show that these mortgage But he attempts to show that these mortgage agreements which measure the security of the bondholders invariably relieve the underwriting house of any duties whatsoever in Bespect to these funds, permitting them to be used in the general business of these houses, subject to their business risks and speculations. He avers that in actual practice these houses pool in their general funds, and subject to the risks of the business not only the proceeds from the of the business, not only the proceeds from the sale of these bonds, but also strictly trust funds consisting of the amortization payments and advanced interest and taxes paid by the mortgagor for the benefit of the bondholders.

Specific attention is called to the fact that the

code adopted by the six houses referred to, while evidently designed to allay apprehension on the part of investors in these mortgage bonds, does not safeguard the points which Mr. Ottinger stresses. It is not enough, it must be admitted, that these underwriters keep a careful check upon the progress and quality of construction, protect the property affected against liens and adverse claimants, supervise the physical maintenance of the mortgaged property, and guarantee conservative and sound appraisals. All these duties devolve upon the trustee as a mat-ter of course. But if the custodians of invested funds fail to apply them to the identical pur-poses nominated by the investors, diverting them to the ordinary uses of the general business carried on, then the relationship of principal and agent has been departed from.

It should be remembered that the records to

which these underwriting houses point with pride were made, for the most part, in the years before this particular form of investment or speculation became general. Not until approximately ten years ago, when housing conditions, both in residential and business sections of the larger cities of the United States, compelled a resort to new methods if the need was to be met, did these processes of financing become popular. Disclosures recently made in some of the cities indicate serious misuse of money subscribed by small investors. Losses have occurred, and it is against the possibility of a recurrence of these that it is sought to define more strictly

In spite of a series of new High Commissioners-no less than three individuals have

the responsibilities of those whom the public

rightly regards as the custodians of savings thus

The French Mandate in Syria

held that office in the last two and a half years -it must be admitted that the situation in Syria continues to be highly unsatisfactory. Although Damascus is now "calm," and the official reports speak with

almost monotonous frequency of French "victories" in other parts of the country, the mere fact that after eighteen months of hostilities there should still be fighting, speaks for itself.

Broadly speaking, the Syrian case, apart from its grievances against French maladministration, is that the inhabitants themselves never wanted to be put under a French mandate. They contend that the country was rescued from the Turks not by the French but by the Arabs, with British help; that up to August, 1920, when the French chased Emir Feisul, the present ruler of Irak, out of Damascus, Syria was governed—whether ill or well is imma-terial since it was what the inhabitants themselves wanted-by an Arab administration; that Syria is in fact an Arab country quite capable of choosing its own ruler—a king, for pref-erence—and looking after itself when it has done so. Finally, that during the war the Arabs were promised independence east of the line Aleppo-Hama-Homs-Damascus and that this promise, originally made by Great Britain, was afterward concurred in by France.

While nearly all this is undeniably trueexcept possibly the assumption that Syria is able to stand alone—it has to be remembered that Moslem and Arab Syria has always been closely associated with the Lebanon, which is predominantly Christian. Ever since 1860, when the French sent an army to their assistance against the Turks, the Lebanese Christians have looked to France as their spiritual home. Moreover, the peace treaties acknowledged France's interest in this region and the Conference of Ambassadors at Paris awarded her a mandate over it.

The Emir Feisul, who is now King of Irak, was at that time established as ruler of Damascus, but he soon afterward found himself in conflict with the French, who, disregarding the Aleppo-Hama-Homs-Damascus line, drove out Feisul and united the two totally dissimilar districts under one mandate. A third elementthe Druses-who live partly in Syria and partly in Palestine and who have been the mainstay of the resistance to the French during the recent fighting, adds yet another incongruity to the patchwork.

The French at first tried to rule this heterogeneous collection, which would seem even more diversified if minor religious and racial differences were taken into account, by dividing the country into three separate states, under one and the same commissioner. But instead of following as far as possible the normal lines of religious demarcation they joined a large section of the orthodox Moslem population with the Lebanese Christians and with the unorthodox Moslems in the state of "Greater Lebanon." Since first dividing the country into three,

the French have several times rearranged the boundaries of the various districts, finally abolishing one of them altogether. But Greater Lebanon, with its mixed Moslem-Christian population, still remains much as it was at the outset, while Syria still goes on chafing at the fact. Nor have any of the other subjects of complaint been completely eliminated.

Though one cannot help but sympathize with them, ft must be admitted that the insurgents

them, ft must be admitted that the insurgents themselves have not so far put forward any compromise which has the slightest prospect of being accepted by France. They know that there is no chance of driving the French into the sea, but they apparently hope to wear her out by guerrilla warfare. They have also launched an appeal to the League of Nations,

launched an appeal to the League of Nations, although as a matter of fact the League, contrary to the popular belief, has virtually no power in this matter.

Yet it should not be impossible for the French to accept some sort of federal solution giving the different parts of the country a sufficiently liberal measure of local autonomy under the ægis of France. Nor, so long as each section is left sufficiently free to paddle its own canoe, should the form of such a state be an insuperable obstacle, in spite of the fact that the Arabs hanker after a Moslem king, while the Lebanese would prefer a republic and the Druses seek nothing better than to be left alone under their traditional feudalism. It is much to be hoped that some responsible leader on one side or the other will set to and tackle this urgent problem and elaborate a scheme which would commend itself to the public opinion of the world as a reasonable basis of negotiation. A continuation of the present state of affairs does not redound to the credit of any of the parties to the dispute.

It must surely come as news to many that, great as have been the profits from the sale of the

Graduating

From the

Ford Class

Ford automobiles, it was at one time believed that they would be greater. One can almost picture an eager stock salesman equipped with paper and pencil figuring out for some prospective buyer just exactly the gains to

be expected from a primary investment. Each owner, he might tell his customer, would most certainly want to change his car every other year, and this would insure that so many thousands of cars would be as good as sold before they were ever made. For were not the present owners certain to be also the proximate owners? Indeed, what could be more natural, than that

once a Ford owner always a Ford owner?

But there's many a slip 'twixt the cup and the lip. And the unexpected happened, as is so often the case in similar circumstances. It is true that in the present instance this fact made but little difference to the final result, for the sales, as all know, have been phenomenal. But nevertheless it was discovered in 1919, just after the war, that, as Dr. David Friday, economist of Washington, said in his testimony during the course of the \$30,000,000 Treasury tax suit brought about by former minority owners of Ford stock, people were using Fords as stepping stones to more expensive cars. "In other words," he added, "they were graduating."

How typical of human nature this is. A little more than twenty years ago the possibility that an automobile would ever be produced for as little as \$2000 was laughed at. Then it was manufactured for considerably less. And then in a trice, as it were, marvelous to relate, it was being used just as a means of progress to some-thing better. But it is an ill wind that blows no one any good. And even if the Ford owners of today have ceased to be the owners of tomorrow, this fact is mitigated by the additional fact that the flood of owners of today seems ever on the increase. The presence of countless college graduates does not prevent their places being filled year by year with others who have seen the benefits that are gained from college training. And who shall say that the Ford graduates have not served their alma mater better by graduating than they would have done by cleaving to the same furrow?

Editorial Notes

The British Film Industry has been told some valuable home truths by Robert R. Hyde, director of the Industrial Welfare Society, who has now returned to London after a six weeks' tour in the United States. Mr. Hyde visited Hollywood, where he was greatly impressed by the efficiency of the arrangements he found. "The men who control the industry," he says, "have taken great risks and they are not afraid of adventure. They have reached a very high standard of technique and are willing to pay for brains." He goes on to ask how Britain is to compete successfully. "When one has seen this industry," he continues, "and realizes how tre-mendous is its financial backing, one outstanding thought arises—if anything is to be done to counter the Americanization of the British Empire by film influence, there is need for greater imagination, boldness, and financial support than has yet been forthcoming." Those who talk lightly of British Government action to discourage American films from entering England may well ponder his words.

Of more than passing interest is a letter published recently in the New York Times, under the caption, "Divine Assistance in Art of Healing," from the pen of a New York medical man. The letter starts by citing with approval the Times' London dispatch wherein the Bishop of Bradford is quoted in these words:

That it is by closer study of the power of prayer and more confidence in prayer that we shall ourselves regain our proper place in the ministry of healing, which we ought to share with those commonly regarded as the sole agents of the ministry, i.e., physicians, surg

To which the contributor adds the comment that, as a physician of many years in practice, he agrees with the bishop as to the power of prayer and the healing efficacy of God. Here is his concluding sentiment:

God is the great Physician, and whatever He for those who put their trust in Him will be for their greatest good,

An American Football Game

(Watched by an Englishman)

Not long ago, in describing an English cricket match, I deplored the absence of an American companion whose reactions to a really exciting American game. I make no applicate absence of any technical knowledge of the game, which is sure to become apparent at the end of the game, which is sure to become apparent at the end of the game, which is sure to become apparent at the cutset.

In the midst of what looked like a perfect orgy of excitement at the end of the game, my American companion said to me, "This is part of the regular procedure." I began to understand. This parade of utter abandonment, called the "snake dance," this throwing away of hats past all chance of recovery, this tearing up the goal posts and breaking them into splinters, was all according to planmothing unusual about any of it.

We were all as safe actually in the midst of that confusion as if we were seated in our own homes discussing the dialogues of Plato! The American apparently know exactly how far he can go with his entusiasm, and enjoys being taken the whole distance. The Englishman, on the other hand, uncertain perhaps as to what might happen, has reduced repression to a fine art. Still, he can cheer on occasions.

For the benefit of those who don't know what a college game looks like, and would like to, I will try to describe

First, you must picture to yourself a huge stadium, packed tier upon tier with eager "fans."

The ladies are present in considerable numbers and take an active part in demonstrations of applause, but I found that they reserve to themselves the right, which they have in common with their English sisters, of saking utterly irrelevant questions at the most inappropriate moments. Thus the men are ensuared into an exhibition of that superior knowledge which, poor deluded beings,

But this is a digression. Pretty soon the bands of the two opposing teams make their entrance, and play themselves, amid cheers, into position on opposite sides of the stadium. The bands have an important part to play. They have to be ready to strike up at any moment, as for instance, when an interruption in the play takes place, and to stop as readily. Music in this case appears to be not so much for the purpose of soothing "the savage breast" as of exciting it.

breast" as of exciting it.

Then through the gate at the end of the stadium come running in close formation the members of the visiting team, and a burst of applause greets them. They crouch, pass the ball and run, until the center of the ground is reached. A few moments later, amid a deafening roar, the home team enters, going through precisely the same performance, as if bent on exhibiting a superior snap and spring to that of their adversaries, that these latter may already be seen as virtually beaten.

And now, before the game commences, there is still

And now, before the game commences, there is still

nenon one must mention, as to the perfect

another phenomenon one must mention, as to the perfect stranger it seems to give an almost uncanny air to the whole proceeding. The cheering for the teams is in the charge of conductors.

The supporters of the teams, i. e., the alumni of the competing colleges, are ranged compactly and face each other on either side of the field. In front of them at intervals of about twenty-five yards are men with megaphones, who start the peculiar college cheers, and, having got them started, conduct them with violent and athletic gesticulation.

This proceeding interested me enormously. Especially was I fascinated in watching the efforts of the conductors on the beaten side to revive the waning enthusiasm, as time eked out and the chances of recovery seemed hopeless. It was a terrible and ungrateful task. It is hard to cheer in defeat. The cheering on the other side is all the time becoming more aggressive and spontaneous. One remembered how the Israelites, in captivity by the waters of Babylon, hung up their harps.

One thing this game has in common with all other football. There is a kick-off. But after that, there is very little kicking. When once a side has gained possession of the ball its whole effort is directed to retaining that possession and advancing the ball by every method, other than kicking, toward its opponents' goal.

To kick it usually means to pass it into your opponents' hands, and you may be a long time recovering it again. Consequently, the game develops into a kind of gladiatorial contest, where each man in the team has the definite task of tackling and overthrowing his opposite member in the other team, quite irrespective of whether he has the ball or not. One of them is bound to have it, and he may be the one.

The game proceeds in spasms. The ball having been "downed," that is, the man who has it having been collared and thrown, the whistle goes and play stops. Immediately the team in possession of the ball goes into a "huddle," which appears to be a kind of secret conference, heads all thrust together. At first I supposed this to be a "scrimmage," until it became evident that only one team was in it.

At this "huddle," the plan of campaign is quickly stated

by the captain, and the team returns to face its crouching opponents. The plan is put into operation. Everything is intense excitement. One player is seen to be running across the ground in the hope of outflanking the enemy Piercing yells and shrieks tear the air. All the spectator begin to rise from their seats, as the runner gath when, lo, one of the opposing team, converting himself into a kind of aerial torpedo, hurls himself at the runner, catches him round the knees, and brings him suddenly

catches him round the knees, and brings him suddenly to earth.

The ball has been advanced three yards nearer the goal, however, and there is great rejoicing. This is repeated many times back and forth, and there are doubtless a vast variety of combinations and subtleties that the uninitiated could hardly hope to grasp:

A touchdown behind the goal line, and the antielimax of the ensuing kick, seemed to follow on the same lines as the English Rugby game. I was told that the game I had been witnessing was not as exciting as some, but I for one was well content, and, as the proverb says, enough is better than too much.

The World's Great Capitals: The Week in Paris

AMPHIBIOUS planes will make possible a new Thames-to-Seine air service. The route from Paris to London will be quicker. Experiments were made by a pilot of the Air Union Company with a land-or-water machine. Below the big boatlike hull the pilot can release pneumatic tire "landings." Therefore, the vehicle, which carries six passengers, can operate either from a land air station or from the surface of a river. Principally, it appears that the intention is to take passengers aboard on the Thames and alight in the river of Paris. The advantage of this method is obvious. Hitherto those who desired to take advantage of the air service had to drive out to the airdromes at Croydon and Le Bourget. These journeys had to be added to the actual air journey. Accordingly, the time saved was greatly diminished, and travel was complicated. Now if the Thames-to-Seine route is successful, passengers will be able to embark in the heart of London and disembark in the heart of Paris, and vice versa. The customs inspectors have, however, to be vice versa. The customs inspectors have, however, to be mollified. They are insisting on a descent at a definite point; but surely it would be easy enough to set up a customs office in the neighborhood of the Pont-Neuf and

+ + + One of the most interesting art exhibitions in Paris is that of the well-known painter, Maurice Denis. The present pictures chiefly relate to his travels. His technique is extremely individual, and his carivases have a tonality which makes their authorship unmistakable. They are decorative in effect. They are almost without shadows. They are filled with an expression of tranquillity. Maurice Denis is especially pleased with provençal landscapes, with their soft-lined horizons and great cypresses. His Brittany scenes also make the most harmonious compositions. His pictures, in short, recall his decorative work on the dome of the Petit Palais and the ceiling of the Theatre des Champs Elysées, which are among the most beautiful productions of our time.

The French Government has drawn up a plan for the reorganization of the match monopoly. It provides for the establishment of a French company over which the state, which is at present the full owner, will retain complete control. In particular, the state will fix the sale prices. The proportion of share capital that may be owned by foreigners is limited to 35 per cent. It is asserted that by handing over the management of the match monopoly to a controlled company the output could be increased threefold and the enterprise be put upon a sounder commercial basis. There is indeed no reason why all the requirements of France and the French colonies should not be supplied and the necessity of buying matches abroad obviated. The scheme has its opponents, who will not hear of any surrender, even partial, of government monopolies, but the opposition can, it is believed, be overcome.

The Paris branch of the League of Nations Union has now its offices in the building of the International Institute of Intellectual Co-operation. Its program of work tute of Intellectual Co-operation. Its program of work discloses its vitality. Many volunteers have come forward to help, and there is no doubt that the movement makes headway in France. It is, of course, one thing for the Government to support the League idea and to utilize the League; but it is quite another to induce the public to take the League seriously and enthusiastically. The propaganda in France is admirably organized and the ideals of the League are assiduously put forward. The principal purpose is to influence public opinion in the cause of international peace through + + +

The French Government has just made a Chevalier of the Legion of Honor of W. L. Warden, the editor of the Continental Daily Mail. It is a deserved though belated distinction. There are no fewer than four daily newspapers printed in English in Paris. They are both American and British, and are all except one connected with a parent newspaper in New York, Chicago, or London. One may not altogether agree with their policy, but they unquestionably fulfill a useful purpose, keeping

American and British residents on the Continent and visitors in close touch with home conditions. But the Daily Mail (that is to say, the Continental edition), which was founded by Northcliffe, played a remarkable, indeed a unique, rôle during the war. It was almost the only newspaper to reach the troops. Its production in the most difficult circumstances, with communications almost entirely cut and its distribution on a long, constantly moving line, required extraordinary alertness and ingenuity. Mr. Warden, as the writer can personally testify, displayed these qualities. The purpose of the Paris journal was certainly not jingoistic, but was that of keeping the men cheerful under great hardships.

The nine hundredth anniversary of the birth of William the Conqueror is to be celebrated in Normandy. In June this year large numbers of English (and, for that matter, American) visitors are expected on the Normandy coast from which set sail William's ships for England on that expedition which changed the whole history of the two Channel countries.

The paper money which was issued by the Chambers of The paper money which was issued by the Chambers of Commerce throughout France—local money which supplemented the national money—has been called in; but although a long time has been given for its return at least 40,000,000 francs are missing. It is not expected that they will ever be reimbursed. They have completely disappeared. The Chambers issued the notes at their own risk with the privilege of reaping any profits that might accrue from the enterprise. Presumably they made profits by the depreciation of the franc, and to those profits must be added the sums which have not been reclaimed. These amounts have been and will be applied very largely to amounts have been and will be applied very largely to works of public utility.

Letters to the Editor

Brist communications are welcomed, but the editor must remain sole judge of their suitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions presented. Anony-mous letters are destroyed unread.

"The Use of the Word 'Unity'"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: I have been very much interested in the letter recently published in the Montron under the caption, "The Use of the Word 'Unity,'" and over the initials F. H. I feel, however, that while your correspondent brings out a great truth, his letter also contains a fallacy. It seems to me that, while true unity is, as he says, universal, and while this should always be kept in thought, yet we cannot dispense with the human footsteps which lead to the demonstration of this unity.

Surely such ideas as those referred to by F. H.—Scan-

Surely such ideas as those referred to by F. H.-Scan-Surely such ideas as those referred to by F. H.—Scandinavian unity, unity of the English-speaking peoples, and so on—rightly viewed, are steps toward the realization of a yet wider unity. I agree that there is a tendency, which needs to be recognized and constantly guarded against, toward so close an association between particular groups as may result in exclusiveness; but surely the way to avoid this is not to be afraid of such linking up, but while encouraging it, at the same time ceaselessly to while encouraging it, at the same time ceaselessly to inculcate the thought of the essential unity of the human race, and the thought that the fuller realization of this is the goal toward which these more limited concepts of

unity are leading.
With unity, as with all great ideas, it is a case of "precept upon precept; line upon line; . . . here a little, and there a little." And if the English-speaking peoples are drawn closer together, shall it not be that they may be able to make a better contribution to the universal good?
We do not say that a united family is less of an asset to the community than a family whose members have little appreciation of family ties; nor does a true patriotism.

appreciation of family ties; nor does a true patricular include any antagonism toward the peoples of other etries than one's own; all right ideas of unity, however ited, can and should be regarded as stepping stones to one all-embracing unity. If this is not so, why do acclaim Locarno?—or, for that matter, and if I maillowed so personal a reference, what is the raison dof the United States?

Cornwell Fore
